Ethics Technology Third Edition Ohio University:

Applied Ethics Larry May, 2017-07-05 This best selling text continues to fill an existing gap in the literature taught in applied ethics courses As a growing number of courses that include the perspectives of diverse cultures are being added to the university curriculum texts are needed that represent more multicultural and diverse histories and backgrounds This new edition enhances gender coverage as nearly half of the pieces are now authored by women The new edition also increases the percentage of pieces written by those who come from a non Western background It offers twelve up to date articles not found in previous editions on human rights environmental ethics poverty war and violence gender race euthanasia and abortion all of these topics are addressed from Western and non Western perspectives *Military Necessity and Just War Statecraft* Eric Patterson, Marc LiVecche, 2023-12-19 This book analyzes the concept of military necessity and just war thinking and argues that it should be seen as a vital moral principle for leaders The principle of military necessity is well understood in the manuals of modern militaries and is recognized in the war convention It is the idea that battlefield commanders should make every effort to win on a local battlefield within legal means and using proportionate and discriminating weapons and tactics Every legal textbook on war includes military necessity as a foundational principle within the jus in bello ethics of fighting war alongside principles of proportionality and distinction and it is taught in every Western military academy Even the International Committee of the Red Cross lauds the concept as a cardinal principle of warfare However unlike legal scholarship one can pick up a book by almost any just war thinker in philosophy theology or the social sciences and the concept is missing altogether in their literature This volume returns military necessity to just war thinking and lays out the argument for doing so Each contributor taps into one of the many dimensions of military necessity such as its relationship to jus ad bellum ethics of going to war categories e g right intention its relationship to jus in bello categories or its application in foreign policy and military doctrine Case studies in the book point out the practical moral dimensions of military necessity in cases from the targeted killing of terrorists to battlefield decisions that led to the use of the atomic bomb at Hiroshima This book will be of interest to students of just war theory military ethics statecraft and international relations **Current Security Management & Ethical Issues of Information Technology** Azari, Rasool, 2003-01-01 This scholarly examination of the ethical issues in information technology management covers basic details such as improving user education and developing security requirements as well as more complicated and far reaching problems such as protecting infrastructure against information warfare Social responsibility is analyzed with global examples and applications including knowledge based society in Latin America socioeconomic factors of technology in the United States and system ethics in the Arab world *The Palgrave Handbook of the Anthropology of Technology* Maja Hojer Bruun, Ayo Wahlberg, Rachel Douglas-Jones, Cathrine Hasse, Klaus Hoeyer, Dorthe Brogård Kristensen, Brit Ross Winthereik, 2022-03-23 This Handbook offers an overview of the thriving and diverse field of anthropological studies of technology It features 39 original chapters

each reviewing the state of the art of current research and enlivening the field of study through ethnographic analysis of human technology interfaces forms of social organisation technological practices and or systems of belief and meaning in different parts of the world The Handbook is organised around some of the most important characteristics of anthropological studies of technology today the diverse knowledge practices that technologies involve and on which they depend the communities collectives and categories that emerge around technologies anthropology's contribution to proliferating debates on ethics values and morality in relation to technology and infrastructures that highlight how all technologies are embedded in broader political economies and socio historical processes that shape and often reinforce inequality and discrimination while also generating diversity All chapters share a commitment to human experiences embodiments practices and materialities in the daily lives of those people and institutions involved in the development manufacturing deployment and or use of particular technologies Chapters 11 and 31 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Resources in Education, 2001-10 [Routledge Handbook of Surveillance Studies](#) Kirstie Ball, Kevin Haggerty, David Lyon, 2012-04-27 Surveillance is both globalized in cooperative schemes such as sharing biometric data and localized in the daily minutiae of social life This innovative handbook explores the empirical theoretical and ethical issues around surveillance and its use in daily life

Cocoa Kristy Leissle, 2018-02-12 Chocolate has long been a favorite indulgence But behind every chocolate bar we unwrap there is a world of power struggles and political maneuvering over its most important ingredient cocoa In this incisive book Kristy Leissle reveals how cocoa which brings pleasure and wealth to relatively few depends upon an extensive global trade system that exploits the labor of five million growers as well as countless other workers and vulnerable groups The reality of this dramatic inequity she explains is often masked by the social cultural emotional and economic values humans have placed upon cocoa from its earliest cultivation in Mesoamerica to the present day Tracing the cocoa value chain from farms in Africa Asia Latin America and the Caribbean through to chocolate factories in Europe and North America Leissle shows how cocoa has been used as a political tool to wield power over others Cocoa's politicization is not however limitless it happens within botanical parameters set by the crop itself and the material reality of its transport storage and manufacture into chocolate As calls for justice in the industry have grown louder Leissle reveals the possibilities for and constraints upon realizing a truly sustainable and fulfilling livelihood for cocoa growers and for keeping the world full of chocolate

Conspiracy/Theory Joseph Masco, Lisa Wedeen, 2023-12-01 In an era of intensified information warfare ranging from global disinformation campaigns to individual attention hacks what are the compelling terms for political judgment How are we to build the knowledge needed to recognize and address important forms of harm when critical information is either not to be trusted or kept hidden Rather than approach conspiratorial narrative as an irrational response to an obviously decipherable reality Conspiracy Theory identifies important affinities between conspiracy

theory and critical theory It recognizes the motivation people have in their capacities as experts theorists and ordinary citizens to search for patterns in events to uncover what is covert and attend to dimensions of life that might be hiding in plain sight If it seems strange that so many find themselves living in incommensurable disorienting realities the multidisciplinary contributors to Conspiracy Theory explore how and why that came to be Across history and geography contributors inquire into the affects and imaginaries of political mobilization tracking counterrevolutionary projects while acknowledging collective futures that demand conspiratorial engagement Contributors Nadia Abu El Haj Hussein Ali Agrama Kathleen Belew Elizabeth Anne Davis Joseph Dumit Faith Hillis Lochlann Jain Demetra Kasimis Susan Lepselter Darryl Li Louisa Lombard Joseph Masco Robert Meister Timothy Melley Rosalind C Morris George Shulman Lisa Wedeen

Horizons of Phenomenology Jeff Yoshimi, Philip Walsh, Patrick Londen, 2023-04-11 This is an open access book which explores phenomenology as both an exceptionally diverse movement in philosophy as well as an active research method that crosses disciplinary boundaries The volume brings together lively overviews of major areas and schools of phenomenology as well as the most recent applications across a range of fields The first part reviews the state of the art in various areas of contemporary phenomenology including several distinct schools of Husserl and Heidegger scholarship as well as approaches derived from Merleau Ponty de Beauvoir Fanon and others An innovative quantitative analysis of citation networks provides rich visualizations of the field as a whole The second part showcases phenomenology as a living discipline that can advance research in other areas While some areas of interaction between phenomenology and other disciplines are by now well established e g cognitive science this volume sheds light on newer areas of application The goal is to move beyond discussions of philosophical method and highlight scholars who are actually doing phenomenology in a variety of areas including Embodiment and questions of gender race and identity The arts visual art literature architecture and Archaeology and anthropology This volume offers a concise introduction to cutting edge phenomenological research and is suitable for both students and specialists
