Ethiopian Hospital Reform Implementation Guideline:

Pharmaceutical Prices in the 21st Century Zaheer-Ud-Din Babar, 2014-12-05 This book provides an overview of the global pharmaceutical pricing policies. Medicines use is increasing globally with the increase in resistant microbes, emergence of new treatments and because of awareness among consumers. This has resulted in increased drug expenditures globally. As the pharmaceutical market is expanding, a variety of pharmaceutical pricing strategies and policies have been employed by drug companies, state organizations and pharmaceutical pricing authorities. *World Hospitals and Health Services*, 2003

Global Tuberculosis Control World Health Organization, 2007 This is the 11th WHO annual report which assesses the progress during 2005 towards the Millennium Development Goals targets for TB control in the world as a whole and in each WHO region and country focusing on five key indicators of case detection, treatment success, incidence, prevalence and deaths. It includes data on case notifications and treatment outcomes from 200 national TB control programmes and an analysis of plans, budgets, expenditures and progress in DOTS (Directly Observed Therapy Short Course) strategies for 22 high burden countries. It summarises progress on initiatives including the development of public private partnerships in TB control, human resource development, the management of drug resistant TB and collaborations in TB and HIV/AIDS control. Findings include that in 2005 there were 8.8 million new cases of TB and an estimated 1.6 million deaths from TB including those co-infected with HIV. The TB incidence rate was stable or falling in all six WHO regions and had reached a peak worldwide. However, the total number of new TB cases was still rising slowly because the case load continued to grow in the African, Eastern Mediterranean and South east Asia regions. **Cumulated Index Medicus**, 1995 [Global Tuberculosis Control](#) World Health Organization, 2007 This is the 11th WHO annual report which assesses the progress during 2005 towards the Millennium Development Goals targets for TB control in the world as a whole and in each WHO region and country focusing on five key indicators of case detection, treatment success, incidence, prevalence and deaths.
