*Democracy, Federalism, the European Revolution, and Global Governance* Andrea Bosco, 2020-06-10 The European Union

is facing today the greatest crisis since its creation Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration However few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction democracy and federalism and the first who tried to realise in June 1940 a European federation on the basis of an Anglo French union This volume traces the fundamental stages of the European unification process placing it in relation to the wider process of world economic and political integration In particular it analyses the historical significance of the European Revolution which is identified in the overcoming of the nation state namely the modern political formula which institutionalised the political division of mankind and the birth of the first truly international state The universal historical significance of the European Revolution lies in its exportability as for the other great European revolutions and therefore its potential as progressively extensible to all the states of the planet Europe was indeed the first region of the world where the barriers between national states fell and a post national political identity emerged complementary to national political identities It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized constituting a guiding principle for global governance

**The Neighbours of the European Union's Neighbours** Sieglinde Gstöhl, Erwan Lannon, 2016-02-24 Should the European Neighbourhood Policy stop at the borders of the European Union's immediate neighbouring countries This book is the first full length study of the neighbours of the EU's neighbours a concept originally introduced by the European Commission with reference to Saharan Africa the Middle East

and Central Asia These regions in the EU's broader neighbourhood are often perceived as an arc of crisis from which manifold challenges emanate for Europe This timely book takes stock of the state of the EU's cooperation with the neighbours of its neighbours and explores how the concept might help promote security stability and prosperity beyond the countries which are formally part of the European Neighbourhood Policy How can the EU create bridges between these regions What instruments does the EU have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation One of the conclusions is the suggestion to consider a pragmatic EU Strategy for the Neighbours of its Neighbours which addresses the needs of the broader EU neighbourhood in a more systematic and consistent manner and helps transform in the long run the arc of crisis into another ring of friends

**Three Revolutions: Mobilization and Change in Contemporary Ukraine I** Pawel Mink, Georges Reichardt, Iwona Kowal, 2019-10-31 Volume One of Three Revolutions presents the overall research and discussions on topics related to the revolutionary events that have unfolded in Ukraine since 1990. The three revolutions referred to in this project include the Revolution on Granite 1990, the Orange Revolution 2004-2005 and the Euromaidan Revolution 2013-2014. The project's overall goal was to determine the extent to which we have the right to use the term revolution in relation to these events. Moreover, the research also uncovered the methodological problems associated with this task. Lastly, the project investigated to what extent the three revolutions are connected to each other and to what extent they are detached. Hence, the research in this volume not only discusses the theoretical aspects but also provides new analyses on such issues as religion, memory and identity in Ukraine.

### **The Changing Political Structure of Europe** René

Lefebvre, Malgosia Fitzmaurice, E.W. Vierdag, 2024-12-09 Following profound modifications of Soviet ideology after the coming to power of Gorbachev Europe experienced an unprecedented time of change which resulted inter alia in the unification of the two German States the abolition of socialist international organizations the obsolescence of neutrality policies in the New Europe and the pull on the European Communities to admit new members These revolutionary events give rise to interesting legal questions Since international relations are changing the legal framework in which these relations are set has to change too In December 1990 international legal aspects of the changes in the political structure of Europe were discussed at a conference held in Amsterdam In this book which takes account of the outcomes of the discussions the international legal framework in which these changes take place and their consequences are described and analyzed by eminent scholars from East and West

### **Transnationalization and Regulatory Change in the EU's Eastern Neighbourhood** Julia

Langbein, 2015-06-03 Regulatory reforms in the EU's Eastern neighbourhood countries are not as sluggish as often perceived Rule enforcement is happening despite the presence of domestic veto players who favour the status quo the lack of EU membership perspective and the presence of Russia as an alternative governance provider Using Ukraine as a primary case study this book examines why convergence with transnational market rules varies across different policy sectors within the Eastern neighbourhood countries It analyzes the drivers of regulatory change and explores the conditions under which post Soviet economies integrate with international markets In doing so it argues that the impetus for regulatory change in the Eastern neighbourhood lies in specific strategies of domestic empowerment applied by external actors Furthermore through the study of the impact of Western and Russian transnational actors the book concludes that Russia's presence does not necessarily hinder the integration of the EU's Eastern neighbours with international markets Instead Russia both weakens and strengthens domestic support for convergence with transnational market rules in the region This book will be of key

interest to students and scholars of European EU studies and international relations especially in the areas of regulatory politics transnational governance public policy and post Soviet transitions
