

Evolution and Selection

What mechanisms lead to changes in the diversity of species on Earth?

Why?

People make choices by selecting options they like best. The natural world also 'selects' (although not as a conscious decision) when environmental conditions allow organisms with a particular genetic trait to live healthier lives than other organisms. In this activity, we will explore how selection affects populations overtime.

Model 1 – Desktop Swab Results

1. What is the source of the bacteria in the culture tube in Model 1?

The bacteria in model 1 comes from the top of a desktop so it most likely came from human sources that have contact with the desk top.

2. How many genetic variants of *E. coli* were present in the culture from the initial swab?

There were four genetic variants of *E. coli* present in the initial swab.

3. What variants of *E. coli* are found on the dish grown without triclosan?

All four variants of *E. coli* are found on the dish grown without the triclosan.

4. Refer to the dish in Model 1 with the medium that included triclosan.

- a. What variants of *E. coli* are found on the dish grown with triclosan?

The only variant of *E. coli* found on the dish grown with triclosan is Variant S.

- b. What likely happened to the other variants of *E. coli* on the dish with the medium containing triclosan?

The other bacteria was likely killed by the triclosan.

PACK OF LIES Sharon Zoller, 2024-04-24 Has your faith in God been damaged by what you've been taught in science? In *Pack of Lies* author Sharon Zoller presents information to breathe new life into your faith demonstrating that school textbooks don't reflect the current scientific information. She discusses the spiritual and cultural consequences of being taught the world is a product of atheistic evolution and she reveals eleven topics from public school science texts that try to support that atheistic evolutionary view. These topics include peer-reviewed articles, rock, sedimentary rock, coal, whales, dinosaurs, similar DNA, developmental similarities, structural similarities, evolution, and natural selection and fossils and transitional forms. Each quote from the textbook is followed by a section rich in gold nugget quotes from today's top scientists like Stephen Meyer, Michael Behe, and James Tour.

Secrets of the Sixth Edition Randall Hedtke, 2010-09-01 Darwin's *On the Origin of the Species* was originally released in 1859 and by 1872 the sixth and last edition was published becoming the defining text for evolutionists. This controversial work has become the foundation of modern textbooks for scientific studies in origins though Darwin himself expressed deep doubts about his own speculations and suppositions. *Secrets of the Sixth Edition* by Randall Hedtke exposes the critical flaws of this landmark book by using Darwin's own words against him. Provides an examination of Darwin's research and the faulty basis of his scientific writings. Filled with extensive documentation looking at the fatal flaws in Darwin's assumptions. Addresses strategies for possible changes to curriculum to address weaknesses in the evolutionary hypothesis. Take an insightful look at Darwin's work and its inaccuracies from a fresh and logical perspective. You will discover the often ignored reasoning behind his own abandonment of some of the core mechanisms of evolution later in his life though they remain unchallenged pillars of unquestioning science today. This informative and easy to read study boldly declares the powerful truth that only biblical creation can explain.

The Meme Machine Susan J. Blackmore,2000-03-16 Humans are extraordinary creatures with the unique ability among animals to imitate and so copy from one another ideas habits skills behaviours inventions songs and stories These are all memes a term first coined by Richard Dawkins in 1976 in his book The Selfish Gene Memes like genes are replicators and this enthralling book is an investigation of whether this link between genes and memes can lead to important discoveries about the nature of the inner self Confronting the deepest questions about our inner selves with all our emotions memories beliefs and decisions Susan Blackmore makes a compelling case for the theory that the inner self is merely an illusion created by the memes for the sake of replication

Charles and Emma Darwin: The Option to Believe Chris Dunford, 2022-05-05 Many people look at the world through a scientific lens that seems to forbid religious conviction but then find themselves drawn by curiosity if not longing to the religious worldview Is this tension inevitable or unnecessary The famously successful marriage of Charles and Emma Darwin illustrates the problem Charles and Emma were very close to each other in social background and knowledge of the world yet they found it difficult to agree on the Question of God Were their religious beliefs driven apart more by his science or by their society Were these potentially compatible or inherently irreconcilable Charles and Emma Darwin The Option to Believe searches for answers in the family s history and individual personalities as well as in the cultural social and intellectual history of that family s society The book also looks back on the Darwins predicament from the perspective of modern science and theology and suggests it is society not science that creates the modern tension between science and religion There is an intellectual option to believe in God that seemed unavailable to Victorians like Charles Darwin yet is certainly available to us today
