G.A.M.E. Games Autonomy Motivation & Education Menno Deen,2015-05-21 This thesis reviews and utilizes concepts from cognitive psychology developmental psychology and game design to bring forth a number of design principles for educational games that may improve students motivation to learn Its main contribution is a novel approach to serious game design namely envisioning play and learning as a restructuring practice This change of perspective from a formal game design approach focused on rules and regulations towards a more activity centered approach focused on process and style may help designers to leverage the motivational potential of games in order to make education more engaging to students
