The Invention of Race Nicolas Bancel, Thomas David, Dominic Thomas, 2014-04-24 This edited collection explores the genesis of scientific conceptions of race and their accompanying impact on the taxonomy of human collections internationally as evidenced in ethnographic museums world fairs zoological gardens international colonial exhibitions and ethnic shows A deep epistemological change took place in Europe in this domain toward the end of the eighteenth century producing new scientific representations of race and thereby triggering a radical transformation in the visual economy relating to race and racial representation and its inscription in the body These practices would play defining roles in shaping public consciousness and the representation of otherness in modern societies The Invention of Race provides contextualization that is often lacking in contemporary discussions on diversity multiculturalism and race

Woeful Afflictions Mary Klages, 2016-11-11 From Tiny Tim to Helen Keller disabled people in the nineteenth century were portrayed in sentimental terms as afflicted beings whose sufferings afforded ablebodied people opportunities to practice empathy and compassion In all kinds of representations of disability from popular fiction to the reports of institutions established for the education and rehabilitation of disabled people the equation of disability and sentimentality served a variety of social functions from ensuring the continued existence of a sympathetic sensibility in a hard hearted market driven world to asserting the selfhood and equality of disabled adults Unique in its focus on blindness and its examination of the interplay between institutional discourse and popular literature Woeful Afflictions offers a detailed historical analysis of the types of cultural work performed by sentimental representations of disability in public reports and lectures exhibitions novels stories poems autobiographical writings and popular media portrayals from the 1830s through the 1890s in the United States Woeful Afflictions combines contemporary scholarship on sentimentalism with the most recent works on the cultural meanings of disability to argue that sentimentalism with its emphasis on creating emotional identifications between texts and readers both reinforces existing associations between disability and otherness and works to rewrite those associations in portraying disabled people in their emotional capacities as no different from the ablebodied This book will interest anyone concerned with disability studies and the social construction of the body with the history of education and of public institutional care in

concepts in English language gender discourses and gender's intersectionalities and sets out the approaches to performance analysis and methods of research employed by the various contributors. Horror Story Rebecca Janicker, 2017-02-19. Looming onto the television landscape in 2011, *American Horror Story* gave viewers a weekly dose of psychological unease and gruesome violence. Embracing the familiar horror conventions of spooky settings, unnerving manifestations and terrifying monsters, the series' co-creators, Ryan Murphy and Brad Falchuk, combine shocking visual effects with an engaging anthology format to provide a modern take on the horror genre. This collection of new essays examines the series' contribution to television horror, focusing on how the show speaks to social concerns, its use of classic horror tropes and its reinvention of the tale of terror for the 21st century. **Darwin in Atlantic Cultures**

Jeannette Eileen Jones, Patrick B. Sharp, 2010-06-21. This collection is an interdisciplinary edited volume that examines the circulation of Darwinian ideas in the Atlantic space as they impacted systems of Western thought and culture. Specifically, the book explores the influence of the principle tenets of Darwinism, such as the theory of evolution, the ape-man theory of human origins and the principle of sexual selection, on established transatlantic intellectual traditions and cultural practices. In doing so, it pays particular attention to how Darwinism reconfigured discourses on race, gender and sexuality in a transnational context. Covering the period from the publication of *The Origin of Species* (1859) to 1933, when the Nazis' National Socialist Party took power in Germany, the essays demonstrate the dissemination of Darwinian thought in the Western world in an unprecedented commerce of ideas not seen since the Protestant Reformation. Learned societies, literary groups, lyceums and churches, among other sites for public discourse, sponsored lectures on the implications of Darwin's theory of evolution for understanding the very ontological codes by which individuals ordered and made sense of their lives. Collectively, these gatherings reflected and constituted what the contributing scholars to this volume view as the discursive power of the cultural politics of Darwinism. **Staging Stigma** M. Chemers, 2016-04-29. *Staging Stigma* is a captivating excursion into the bizarre world of the American freak show. Chemers critically examines several key moments of a performance tradition in which the truth is often stranger than the fiction. Grounded in meticulous historical research and cultural criticism, Chemers' analysis reveals untold stories of freaks that will change the way we understand both performance and disability in America. This book is a must-have for serious students of freakery or anyone who is curious about the hidden side of American theatrical history.
