

2. Background and theoretical considerations: Understanding the child

2.1. Developmental processes

The approach here views the development of self-regulation skills as emerging from developmental and maturational changes throughout childhood. The study

2.2. Self-regulation: Developmental and maturational changes across childhood

Self-regulation refers to the capacity to regulate one's thoughts, feelings, and actions. It involves a child's ability to control their emotions, thoughts, and behaviors in order to achieve their goals. This capacity is developed through a combination of biological maturation and environmental influences. The study

2.3. Effects of the study's variables on self-regulation: Developmental and maturational changes

Effects of self-regulation on outcomes of the study have been investigated. The study found that children with higher self-regulation skills showed better outcomes in terms of academic achievement, social skills, and emotional regulation. The study

2.4. Implications for practice: Developmental and maturational changes

The findings of this study have implications for practice. The study suggests that children with lower self-regulation skills may benefit from interventions that target self-regulation skills. The study

2.5. Implications for practice: Developmental and maturational changes

The findings of this study have implications for practice. The study suggests that children with lower self-regulation skills may benefit from interventions that target self-regulation skills. The study

2.6. Implications for practice: Developmental and maturational changes

The findings of this study have implications for practice. The study suggests that children with lower self-regulation skills may benefit from interventions that target self-regulation skills. The study

2.7. Implications for practice: Developmental and maturational changes

The findings of this study have implications for practice. The study suggests that children with lower self-regulation skills may benefit from interventions that target self-regulation skills. The study

2.8. Implications for practice: Developmental and maturational changes

The findings of this study have implications for practice. The study suggests that children with lower self-regulation skills may benefit from interventions that target self-regulation skills. The study
