French Relations English Edition:

Anaphoric Relations in English and French Francis Cornish, 2015-07-03 First published in 1986 this book focuses on Anaphoric relations in the English and French languages a phenomenon that involves a complex interaction between grammar and discourse Studies of anaphora taking a largely textual approach to the subject have tended to underestimate the effect upon its formation of referential and discourse factors while studies framed within a psycholinguistic and computational perspective have been inclined to minimise the importance of the purely linguistic features connected with anaphora This volume places the study of anaphora upon a firmer foundation by examining both its nature and functions in discourse by pinpointing the range of factors relevant to its operation in the two languages under study and by attempting to relate the textual and interactional perspectives within a more comprehensive framework *English Edition* Europäische Gemeinschaften / Kommission, 2012-05-02 No detailed description available for English Edition

Transnationalism and Translation in Modern Chinese, English, French and Japanese Literatures Ryan Johnson, 2020-12-15 The theory of literary worlds has become increasingly important in comparative and

world literatures But how are the often contradictory elements of Eastern and Western literatures to cohere in the new worlds such contact creates Drawing on the latest work in philosophical logic and analytic Asian philosophy this monograph proposes a new model of literary worlds that is best suited to comparative literature dealing with Western and East Asian traditions Unlike much discussion of world literature anchored in North American traditions featured here is the transnational work of artists philosophers and poets writing in English French Japanese and Mandarin in the twentieth century Rather than imposing sharp borders this book suggests that vague boundaries link Eastern and Western literary works and traditions and that degrees of distance can better help us to see the multiple dimensions that both distinguish and join together literary worlds East and West As such it enables us to grasp not only how East Asian and Western writers translate one another's works into their own languages and traditions but also how modern writers East and West modify their own traditions in order to make them fit in the new constellation of literary worlds brought about by the complex flow of literary information across twentieth century Eurasia

Shakespeare, Politics, and Italy Michael J. Redmond,2016-04-01 The use of Italian culture in the Jacobean theatre was never an isolated gesture In considering the ideological repercussions of references to Italy in prominent works by Shakespeare and his contemporaries Michael J Redmond argues that early modern intertextuality was a dynamic process of allusion quotation and revision Beyond any individual narrative source Redmond foregrounds the fundamental role of Italian textual precedents in the staging of domestic anxieties about state crisis nationalism and court intrigue By focusing on the self conscious overt rehearsal of existing texts and genres the book offers a new approach to the intertextual strategies of early modern English political drama The pervasive circulation of Cinquecento political theorists like Machiavelli Castiglione and Guicciardini combined with recurrent English representations of Italy to ensure that the negotiation with previous writing formed an integral part of the dramatic agendas of period plays

Reinventing Babel in Medieval French Emma Campbell, 2023-09-09 How can untranslatability help us to think about the historical as well as the cultural and linguistic dimensions of translation For the past two centuries theoretical debates about translation have responded to the idea that translation overcomes linguistic and cultural incommensurability while never inscribing full equivalence More recently untranslatability has been foregrounded in projects at the intersections between translation studies and other disciplines notably philosophy and comparative literature The critical turn to untranslatability re emphasizes the importance of translation's negotiation with foreignness or difference and prompts further reflection on how that might be understood historically philosophically and ethically If translation never replicates a source exactly what does it mean to communicate some elements and not others What or who determines what is translatable or what can or cannot be recontextualized What linguistic political cultural or historical factors condition such determinations Central to these questions is the way translation negotiates with and inscribes asymmetries among languages and cultures operations that are inevitably ethical and political as well as linguistic This book explores how approaching questions of translatability and untranslatability through premodern texts and languages can inform broader interdisciplinary conversations about translation as a concept and a practice Working with case studies drawn from the francophone cultures of Flanders England and northern France it explores how medieval texts challenge modern definitions of language text and translation and in so doing how such texts can open sites of variance and non identity within what later became the hegemonic global languages we know today
