

Student Exploration: Hearing: Frequency and Volume

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

[Note to teachers and students: This Gizmo involves listening to and comparing faint sounds. It is recommended that students use headphones and that the room is kept as quiet as possible.]

Vocabulary: decibel, equal-loudness curve, frequency, hertz, logarithm, pitch, threshold, volume

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. A dog whistle emits a sound that dogs can hear but humans cannot. Why do you think dogs can perceive this sound?

dogs can hear higher frequencies

2. How do you think your ability to perceive different sounds might change as you age?

sound frequencies decrease

Gizmo Warm-up

Have you ever wondered how good your hearing is? The *Hearing: Frequency and Volume* Gizmo allows you to test how well you hear tones at different **frequencies**. The frequency of a sound wave is measured in **hertz** (Hz), where 1 Hz is equal to one wave passing each second. Frequency is related to the **pitch** of a sound, or whether it sounds high (like a whistle) or low (like a tuba).

Before you begin, be sure you are in a very quiet setting. Headphones are recommended for this Gizmo. Set the **System volume** to 1 and click the **test** button (). Adjust the **System volume** and your computer so that you hear a moderately loud tone when you click **test**.

1. Drag the **60-Hz** slider and the **4,000-Hz** slider to the top and click **Play** for each sound.

Describe what you hear. **[10]**

At 60 Hz, I very soft, faint tone (noise), at 4000 Hz, I heard a very sharp, loud tone (noise)

Exploration of Textual Interactions in CALL Learning Communities: Emerging Research and Opportunities White, Jonathan R.,2017-03-01 Computer assisted language learning CALL has greatly enhanced the realm of online social interaction and behavior In language classrooms it allows the opportunity for students to enhance their learning experiences Exploration of Textual

Interactions in CALL Learning Communities Emerging Research and Opportunities is an ideal source of academic research on the pedagogical implications of online communication in language learning environments Highlighting perspectives on topics such as reduced forms ellipsis and learner autonomy this book is ideally designed for educators researchers graduate students and professionals interested in the role of computer mediated communication in language learning **Advanced Algorithms for Mineral and Hydrocarbon Exploration Using Synthetic Aperture Radar** Maged Marghany, 2021-12-02 Advanced Algorithms for Mineral and Hydrocarbon Exploration Using Synthetic Aperture Radar is a research and practically based reference that bridges the gap between the remote sensing industry and the mineral and hydrocarbon exploration industry In this context the book explains how to commercialize the applications of synthetic aperture radar and quantum interferometry synthetic aperture radar QInSAR for mineral and hydrocarbon exploration This multidisciplinary reference is useful for oil and gas companies the mining industry geoscientists and coastal and petroleum engineers Presents both theoretical and practical applications of various types of remote sensing for hydrocarbon and mineral exploration Covers specific problems for exploration professionals and provides applications for solving each problem Includes more than 100 images and figures to help explain the concepts and applications described in the book **Pathways to Exploration** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Division on Engineering and Physical Sciences, Space Studies Board, Aeronautics and Space Engineering Board, Committee on Human Spaceflight, 2014-09-30 The United States has publicly funded its human spaceflight program on a continuous basis for more than a half century through three wars and a half dozen recessions from the early Mercury and Gemini suborbital and Earth orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the United States operated for three decades Today the United States is the major partner in a massive orbital facility the International Space Station that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights And yet the long term future of human spaceflight beyond this project is unclear Pronouncements by multiple presidents of bold new ventures by Americans to the Moon to Mars and to an asteroid in its native orbit have not been matched by the same commitment that accompanied President Kennedy's now fabled 1961 speech namely the substantial increase in NASA funding needed to make it happen Are we still committed to advancing human spaceflight What should a long term goal be and what does the United States need to do to achieve it Pathways to Exploration explores the case for advancing this endeavor drawing on the history of rationales for human spaceflight examining the attitudes of stakeholders and the public and carefully assessing the technical and fiscal realities This report recommends maintaining the long term focus on Mars as the horizon goal for human space exploration With this goal in mind the report considers funding levels necessary to maintain a robust tempo of execution current research and exploration projects and the time resources needed to continue them and international cooperation that could contribute to the achievement of spaceflight to Mars

According to Pathways to Exploration a successful U S program would require sustained national commitment and a budget that increases by more than the rate of inflation In reviving a U S human exploration program capable of answering the enduring questions about humanity s destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier The recommendations of Pathways to Exploration provide a clear map toward a human spaceflight program that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal

The Intimacy of Consciousness Exploration and Transpersonal Psychotherapy Regina U. Hess, Ingo B. Jahrsetz, Judith Miller, 2018-04-18 This volume brings together a group of transpersonal psychotherapists and spiritual teachers to tell of their own very personal and intimate explorations of consciousness What has the experience of coming home meant to them Has it meant connecting with God the Divine Feminine the Cosmos the Sacred Has it meant arriving at home in themselves in their very center in their essence Where is home Is it inside is it outside or is it both All world cultures have stories about this particular place In addition to describing their own unique quests the contributors also share how radically such a journey challenged them to face their own vulnerabilities and shadow parts Various very different and often startling personal stories are told Through reading of the very human trials and psycho spiritual challenges that these nine international teachers have endured on their journeys home readers will gain insights and greater understanding regarding their own explorations of consciousness They will realize that the spiritual journey can have many faces and take many paths The one thing however that all authors have in common is the longing to be fully and wholly oneself
