Jones Deloach, 2016-09-01 Many school districts across this great nation are facing serious patterns of underachievement of students who do not fit well in a mainstream educational environment The purpose of this qualitative phenomenological research study was to explore the perceptions and experiences of graduates from a credit recovery nontraditional alternative high school that influenced his or her graduation Nationally many high school students are not earning sufficient credits to remain on grade level with their freshman level cohort These at risk students need options with stronger incentives to obtain high school credits and meet graduation requirements Credit recovery nontraditional alternative high schools involve an at risk student population who are at a greater risk of academic social and emotional struggles These students benefit from additional support that a nontraditional setting offers This study involved interviewing 12 high school graduates who attended and graduated from a credit recovery nontraditional alternative high school There was a diversified group by age and other demographics representing five graduating classes With this research study the investigator determined graduates perceptions of credit recovery in their nontraditional alternative high school were overwhelmingly positive The lived experiences explored in this study may help school leaders policy makers teachers staff parents and community partners understand the unique needs of this population

*Computer Assisted Learning in Physics Education* Alfred Bork, 2013-09-11 Computer Assisted Learning in Physics Education focuses on the use of computers in learning physics Organized into six chapters the book begins with an explanation of the CONDUIT series in physics Subsequent chapters focus on physics education with or without computers a computer based course in classical mechanics physics in the Irvine Educational Technology Center and an electronics course using an intelligent video format The last chapter addresses computation as a physical and intellectual environment for learning physics The book will be useful for physics students as an aid in the use of computers in this field *The Higher Learning in America* Robert Maynard Hutchins, 2017-07-05 Perhaps the pivotal book in the reform of higher education in the United States Robert M Hutchins classic is once again available with a brilliant personal and professional appreciation by Harry S Ashmore When it was published in 1936 *The Higher Learning in America* brought into focus the root causes of the controversies that still beset the nation s educational system Taking office in 1929 as president of the University of Chicago Hutchins began his tenure by declaring the learning available in even the most prestigious universities grossly deficient He cited himself as case in point At Yale he had graduated at the top of his college class and set a record in the law school that led to appointment as professor and at 26 promotion to dean But he had acquired only some knowledge of the Bible of Shakespeare and Faust of one dialogue of Plato and of the opinions of many semi literate and a few literate judges and that was about all The curricular reforms and administrative reorganization he undertook at Chicago are set forth in this volume along with the philosophical arguments he worked out to explicate and defend his views His goal was to reestablish the

liberal arts and humanities as the basis for undergraduate education consigning specialization and research to graduate and professional schools Hutchins envisioned the university as a community of scholars who in addition to teaching and research provided independent thought and criticism of a society being rapidly transformed by science and technology Challenging the educational establishment at every pertinent level he became the most celebrated and most controversial intellectual of his era After twenty two years at Chicago Hutchins became associate director of the newly enriched Ford Foundation where he was primarily responsible for the bold reforms sponsored by its Fund for the Advancement of Education and Fund for Adult Education In 1960 he est

**Universitas** Thomas E. Boudreau,1998-05-12 Believing that current educational policies and practices in American institutions of higher learning contribute to an incoherent disjunctive and wasteful four year experience for many undergraduates the author provides a sense of new direction to aid in the restructuring and reform of undergraduate education in America The primary question of the work is How can the years of undergraduate education empower the student with the knowledge and integrated set of skills needed for a lifetime of learning and productive work Boudreau focuses on the primary responsibility of all institutions of higher learning to provide a superior undergraduate education All other functions of a university should be secondary to this commitment Unfortunately this basic premise seems lost today This work argues that universities must undergo significant reform and renewal especially at the undergraduate level if they are to prepare students successfully for the future
