Mathematical Modelling for Teachers Jürgen Maaß, Niamh O'Meara, Patrick Johnson, John O'Donoghue, 2018-10-01 While there are many areas of focus in mathematics education there are many good reasons for offering applicable mathematics education in schools Let us just mention two of the most important reasons On the one hand a focus on the practical side of mathematics presents a convincing and motivating answer to the typical student question Why study mathematics On the other hand education policy seems inclined to move in this direction by implementing international testing curricula and catalogues of skills The most important feature of this book is that the authors speak directly to you the mathematics teachers The authors attempt to draw you into a continuous dialogue about activities you are asked to engage in as learners You are asked to do something and through doing and reflecting you will gain first hand experience of new approaches and materials In this way you can learn to teach applicable mathematics to your students using your own experience as learners of applicable mathematics motivated and supported by the book Here applicable mathematics education is the phrase we use to describe reality based mathematics education Reality based mathematics relies heavily on problem solving and a positive disposition to engage with mathematics Modelling reality and simulating selected aspects of reality are other pillars of reality based mathematics education

The Science of Boredom Sandi Mann, 2017-11-02 Are we living in an age where we are more boredom prone Or are other people boring us Or could we be that boring person In our current information age we are constantly connected to technology and have so many varied ways to spend our leisure time that we should all surely never know what boredom feels like Yet boredom appears to be on the rise it seems that the more we have to stimulate us the more stimulation we crave In a quest to relieve our boredom we engage in dangerous risk taking from extreme sports to drugs to gambling to anti social behaviour or we overindulge in shopping or eating The Science of Boredom explores the causes and consequences of boredom in the fast paced twenty first century Parents are desperate to keep their children entertained during every waking moment the education system is geared towards interactivity and attention spans are dropping as we use multiple devices at all times But the world of work

can be increasingly repetitive and routine and we are losing the ability to tolerate this everyday tedium Using Sandi Mann's own ground breaking research into boredom this book tells the story of how we act react and cope when we are bored and argues that there is a positive side to boredom It can be a catalyst for humour fun reflection creativity and inspiration The radical solution to the boredom problem is to harness it rather than try to avoid it Allowing yourself time away from constant stimuli can enrich your life We should all embrace our boredom and see the upside of our downtime

Location, Space and Place in Religious Education Martin Rothgangel, Kerstin von Brömssen, Hans-Günter Heimbrock, Geir Skeie, 2017 People form attachments to their home their neighbourhood and environment to the region and nation to which they belong They express feelings about space and place especially so in globalized times In religious studies in theology and in education there is a growing interest in spatial theories either as constructed within national borders or within international and transnational spaces The spatial turn has become an acknowledged term in interdisciplinary discourses Although every practice of religious education is situated and contextually dependent religious education RE research until now has not systematically paid attention to this fundamental insight This volume is devoted specifically to clarifying the close relationship between RE practice and spatial and situational conditions After clarifying the main concepts in Part 1 Part 2 includes chapters related to classroom studies while Part 3 focuses on studies about teachers of religious education Part 4 contains studies beyond the classroom such as school chapels churches and inner space All contributions to this volume were developed in the context of the European Network for Religious Education through Contextual Approaches ENRECA which has focused recently on the central issue of space and place
