## Friday 24 May 2013 Morning Statistics 1:

The Rhodesian Air Force in Zimbabwe's War of Liberation, 1966-1980 Darlington Mutanda, 2016-11-10 This book evaluates the development of the Rhodesian Air Force during the Second Chimurenga or Bush War 1966-1980. Airpower in irregular conflict is effective at the tactical level because guerrilla warfare is not a purely military conflict. The Rhodesian Air Force was deployed in a war winning versus a supporting role as a result of the shortage of manpower to deal with insurgency and almost all units of the Rhodesian Security Forces depended on its tactical effectiveness. Technical challenges faced by the Air Force combined with the rate of guerrilla infiltration and the misuse of airpower to bomb guerrilla bases in neighboring countries largely negated the success of airpower. After Saturday Comes Sunday Elizabeth Natalie Kendal, 2016-06-08 The post-Christian West is in decline; revived Islam is on the rise; and Mesopotamia, Syria, Iraq, the cradle of civilization, has become ground zero in a battle for civilization. Despised as infidels, unbelievers, and kafir, unclean Mesopotamia's indigenous Christian peoples are targeted by fundamentalist Muslims and jihadists for subjugation, exploitation, and elimination. Pushed deep into the fog of war, buried under a mountain of propaganda and rendered invisible by a shroud of silence, they are betrayed and abandoned by the West's progressive political, academic, and media elites who cling to utopian fantasies about Islam while nurturing deep-seated hostility towards Christianity. If they are to survive as a people in their historic homeland, the Christians of Mesopotamia will need all the help they can get. If Western civilization is to survive as a force in its historic heartland, Europe, then we had better start seeing, hearing, and believing the Christians of the Middle East for their plight prefigures our own. **Disorder and the Disinformation Society** Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society. Through an investigation of informationalism defined as a contemporary form of capitalism, it describes the social processes producing informational disorder. While most social theory sees disorder as secondary, pathological, or uninteresting, this book takes disordering processes as central to social life. The

book engages with theories of information society which privilege information order offering a strong counterpoint centred on disinformation Disorder and the Disinformation Society offers a practical agenda arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism It outlines the dynamics of software failure as they impinge on of information workers and on daily life explores why computerized finance has become inherently self disruptive asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship and reveals how social media can extend but also distort the development of social movements
