Moshe Barak, Michael Hacker, 2012-01-01 Fostering Human Development Through Engineering and Technology Education ETE is a collaborative work offered to students scholars researchers decision makers curriculum developers and educators interested in the rich learning opportunities afforded by engineering and technology education This book provides perspective about the roles ETE might uniquely play in applying contemporary pedagogical practices to enhance students intellectual cognitive and social skills in the service of promoting equitable and sustainable human development Education about engineering and technology has become an imperative for all people due to the exponential rate of technological change the impact of globalization on culture and economy and the essential contributions engineering and technology make in addressing global and environmental challenges Many of today's students wish to use their education to influence the future and school based engineering and technology education programs meet the needs of these millennial students who are civic minded team oriented and want to make a difference Therefore support has been rapidly increasing for the establishment of school based engineering and technology education ETE programs in many countries across the globe Chapters in this book provide discussion about dimensions of learning capabilities concepts and skills for third millennial learners culturally relevant learning through ETE and the promise of new pedagogies such as gaming and other project based learning approaches in our digitally connected world The author team includes renowned educational theorists cognitive scientists scientists and engineers instructional designers expert practitioners and researchers who have coalesced

best practice and contemporary thought from seven countries **As the Hawks Free of Earth's Bounds** Otis Hammonds, Innovation in Urban and Regional Planning Alessandro Marucci, Francesco Zullo, Lorena Fiorini, Lucia Saganeiti, 2024-02-29 This book gathers the proceedings of the INPUT2023 Conference on Innovation in Urban and Regional Planning The 12th International Conference INPUT was held at the University of L'Aquila Italy on September 6-8 2023 and brought together international scholars in the fields of planning civil engineering and architecture ecology and social science to strengthen the knowledge on nature based solutions and to enhance the implementation and replication of these solutions in different contexts The book represents the state of the art of modeling and computational approaches to innovations in urban and regional planning with a transdisciplinary and borderless character to address the complexity of contemporary socio-ecological systems and following a practice oriented and problem solving approach Computational tools technologies data mathematical models and decision support tools are explored for providing innovative spatial planning modeling methodologies *A Research Guide to Cartographic Resources* Eva H. Dodsworth, 2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields *A Research Guide to Cartographic Resources* navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations *A Research Guide to Cartographic Resources* consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets *Land Cover Atlas of Yemen* FAO, 2024-12-05 Understanding the utilization distribution temporal variations and human activities related to natural resources is crucial for sustainable land management especially in Yemen a country grappling with prolonged conflicts and severe environmental challenges The competition for natural resources such as water arable land and wood among various stakeholders with diverse interests often leads to land degradation and is a key driver of tensions and conflicts Therefore obtaining this

fundamental information is imperative for promoting sustainable land use and mitigating the negative impacts of resource competition. In Yemen, land cover mapping is essential to support growing concerns about food and nutrition security, improving the resilience of livelihoods to threats and crises in the context of climate change. This atlas contains the land cover dataset for Yemen prepared as part of a portfolio of projects aimed at enhancing governance and preventing conflicts across the country. The ultimate goal is to reduce displacement and irregular migration by promoting household food security, nutrition, and income. Creating an accurate initial inventory of natural resources is critical for sustaining these achievements over time. The new land cover dataset allows for detailed mapping of natural resources, human settlements, and activities in Yemen. It represents an updated dataset developed for Yemen, integrating high-resolution multi-temporal imagery, machine learning algorithms, and the Land Cover Meta Language (LCML) to support the Natural Resource Management strategy, land use planning, and other innovative approaches.

Improve agriculture monitoring systems through satellite imagery for the Islamic Republic of Iran Food and Agriculture Organization of the United Nations, 2019-12-09. Due to more and more frequent extreme climate events (floods, drought, and frosts) and due to the changes in precipitation amounts, seasonality, intensity, and warming temperatures that are impacting rainfed agriculture and changing growing seasons, the Ministry of Jihad e Agriculture (MOJA) of the Islamic Republic of Iran asked the Food and Agriculture Organization of the United Nations (FAO) to provide assistance in setting up an improved agriculture monitoring system based on integral use of advanced geospatial technologies to support development of the techniques, policy, and investment conditions to achieve sustainable agricultural development under the current changing conditions of climate. The project has focused on the identification of state-of-the-art methods and strategy for acreage and yield estimation based on an assessment of the existing monitoring methodology, optimized through the use of remote sensing. In addition, the project benefitted from the availability of multi-temporal satellite images for testing and monitoring of a range of crops in 3 selected pilot areas: the provinces of Zanjan and Mazandaran and the region of the south of Kerman. The publication reports data collected, processes followed, and results obtained at this stage of the still not completely concluded study.

Imaging Floods and Glacier Geohazards with Remote Sensing Francesca Cigna, Hongjie Xie, Karem Chokmani, 2021-05-11. Remote sensing plays a pivotal role in understanding where and how floods and glacier geohazards occur, their severity, causes, and types, and the risk that they may pose to populations, activities, and properties. By providing a spectrum of imaging capabilities, resolutions, and temporal and spatial coverage, remote sensing data acquired from satellite, aerial, and ground-based platforms provide key geo-information to characterize and model these processes. This book includes research papers on novel technologies, e.g., sensors, platforms, data, e.g., multi-spectral, radar, laser scanning, GPS, gravity, and analysis methods, e.g., change detection, offset tracking, structure from motion, 3D modeling, radar interferometry, automated classification, machine learning, spectral indices, probabilistic approaches for flood and glacier imaging. Through target applications and case studies distributed globally, these articles contribute to the discussion on the

current potential and limitations of remote sensing in this specialist research field as well as the identification of trends and future perspectives
