<u>Computational Thinking: How computers think, decide and learn, when human limits start and computers champ. Vol.1</u> Jorge Guerra Pires,2022-07-05 In 2013 I wrote a book 1 At the time I wanted to explain neural networks in simple terms I had high school students at my mind I have expressed my concerns that machine learning was dominating the world and people had no idea about it smartphones were not popular in Brazil and started go gain attention as personal computers Deep learning started to gain momentum on 2012 and nowadays is kind of the rule At the time YouTube was bad pretty bad a must say I used to save the links to my videos as so I could avoid passing through the main page Computational thinking is synonymous of algorithms I cannot think a single computational routine which is not an algorithm after all computers are stupid they need to be told what to do even when it is abstract e g machine learning What is computational think though Think like this a thought experiment Suppose you give your result from your model to someone Do you believe the person would be able to tell the difference between your solution from your algorithm and a human If not this is computational thinking It is a machine i e an algorithm a routine doing human thinking work As we are going to see based on Kasabov s work we may actually be able to send thinking loads to computers in the future Initially this book supposes to be called computational intelligence Nonetheless I thought we do not necessarily need intelligence to build models not in the sense to artificial intelligence or even human intelligence Furthermore as we shall learn from Daniel Kahneman and colleagues we can achieve nice models for decision making even with simple models when compared to humans imagine what we can do with machine learning cloud computing databases such as MongoDB and Firebase Possible public Web developers wanting to expand their horizon here I am being modest I feel any web coder should learn computational thinking as so they can add intelligence to their dummy apps People from computational intelligence waiting to learn new tricks Computer scientists for sure I would recommend to computational biologists and anyone interested in bioinformatics Applied mathematics and computational mathematician for sure Anyone that is opened to new ideas but has a minimum computer programming background Maybe medical doctors and biologists one of my PhD advisors was a surgeon with a PhD in mathematics thus we may have this profile in medicine and especially in biology External resources and tricks My GitHub profile Our sandbox I have used links to my LinkedIn profile to posts related to the discussions Feel free to start a conversation on LinkedIn or to connect Just comment on the posts and I will be noticed I have used several external links to articles online this is in addition to the classical academic reference standard With Special release of My selected assays from Medium on Computer programming Artificial Intelligence 1 Redes Neurais em termos simples como aprendemos pensamos e modelamos https www academia edu 18365339 Redes_Neurais_em_termos_simples_como_aprendemos_pensamos_e_modelamos fbclid IwAR3NLQt003L5QXZQNLSePIxJxUf7NbqsthEjj8rb1zgfpgEgzkiqoNfO0RY Accessed on 30 06 22 **Sales Presentations For Dummies** Julie M.
