South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

The Man Who Knew Sebastian Mallaby, 2017-12-05 Exceptional Deeply researched and elegantly written As a description of the politics and pressures under which modern independent central banking has to operate the book is incomparable Financial Times The definitive biography of the most important economic statesman of our time from the bestselling author of *The Power Law* and *More Money Than God* Sebastian Mallaby's magisterial biography of Alan Greenspan the product of over five years of research based on untrammelled access to his subject and his closest professional and personal intimates brings into vivid focus the mysterious point where the government and the economy meet To understand Greenspan's story is to see the economic and political landscape of our time and the presidency from Reagan to George W Bush in a whole new light As the most influential economic statesman of his age Greenspan spent a lifetime grappling with a momentous shift the transformation of finance from the fixed and regulated system of the post war era to the free for all of the past quarter century The story of Greenspan is also the story of the making of modern finance for good and for ill Greenspan's life is a quintessential American success story raised by a single mother in the Jewish migr community of Washington Heights he was a math prodigy who found a niche as a stats crunching consultant A master at explaining the economic weather to captains of industry he translated that skill into advising Richard Nixon in his 1968 campaign This led to a perch on the White House Council of Economic Advisers and then to a dazzling array of business and government roles from which the path to the Fed was relatively clear A fire breathing libertarian and disciple of Ayn Rand in his youth who once called the Fed's creation a historic mistake Mallaby shows how Greenspan reinvented himself as a pragmatist once in power In his analysis and in his core mission of keeping inflation in check he was a maestro indeed and hailed as such At his retirement in 2006 he was lauded as the age's necessary man the veritable God in the machine the global economy's avatar His memoirs sold for record sums to publishers around the world But then came 2008 Mallaby's story lands with both feet on the great crash which did so much to damage Alan Greenspan's reputation Mallaby argues that the conventional wisdom is off base Greenspan wasn't a naive ideologue who believed greater regulation was unnecessary He had pressed for greater regulation of some key areas of finance over the years and had gotten nowhere To argue that he didn't know the risks in irrational markets is to miss the point He knew more than almost anyone the

question is why he didn't act and whether anyone else could or would have. A close reading of Greenspan's life provides fascinating answers to these questions, answers whose lessons we would do well to heed. Because perhaps Mallaby's greatest lesson is that economic statesmanship like political statesmanship is the art of the possible. *The Man Who Knew* is a searching reckoning with what exactly comprised the art and the possible in the career of Alan Greenspan.
