Social Mobility Lee Elliot Major, Stephen Machin, 2018-09-27 What are the effects of decreasing social mobility How does education help and hinder us in improving our life chances Why are so many of us stuck on the same social rung as our parents Apart from the USA Britain has the lowest social mobility in the Western world The lack of movement in who gets where in society particularly when people are stuck at the bottom and the top costs the nation dear both in terms of the unfulfilled talents of those left behind and an increasingly detached elite disinterested in improvements that benefit the rest of society This book analyses cutting edge research into how social mobility has changed in Britain over the years the shifting role of schools and universities in creating a fairer future and the key to what makes some countries and regions so much richer in opportunities bringing a clearer understanding of what works and how we can better shape our future *The Routledge Handbook of the Economics of Education* Brian P. McCall, 2021-12-30 The economics of education is a burgeoning area of study employing increasingly sophisticated analytical tools to answer questions with high societal impact Thus the aim of this handbook is to provide readers with an up to date overview of the current state of the field of the economics of education and its main areas of research This comprehensive handbook provides an authoritative overview of key theoretical and policy areas covering topics like econometric methods for education economics returns to education competition in education provision education and economic growth and education and inequality It reviews the current state of research from early childhood through postgraduate education as well as adult education and life long learning Offering a truly international perspective the handbook benefits from a global group of contributors and attention to both developed and developing country contexts The Routledge Handbook of the Economics of Education will be a valuable resource for advanced students, researchers and policymakers across economics, education and public policy

Reconstructing the Middle East Abdulwahab Alkebsi, Nathan J Brown, Charlotta Sparre, 2017-02-24 It is clear by now that the label Arab Spring has proven too simplistic to describe the uprisings that upended the political order of the Arab world in late 2010 Brutal crackdowns and civil conflict in Syria, Libya and Yemen dashed the hopes that peaceful democratic revolutions would sweep the region In other countries the departure of authoritarian leaders led to many false starts without producing democratic conclusions Societies that had appeared united in opposition suddenly seemed fractious Youth were once again banished to the political margins Reconstructing the Middle East examines the changes that happened within the region from 2010 and the long term challenges and opportunities they present Featuring the work of authors with a diversity of perspectives most

of whom hail from the region it addresses key issues of political economic and societal changes the role of young people and of the international community In addition the book deals with the questions of both political and economic reform and the intertwined nature of the two Political reform that allows greater participation will fail to quell frustration if Arabs continue to feel that their job prospects are bleak Similarly Arabs will not accept economic reform that restores growth but continues to fence off the political sphere This book offers a unique perspective on the uprisings by focusing on specific issue areas where change is needed and offering a roadmap for the long road towards state building and new social contracts based on political inclusion respect for pluralism and sustained economic growth As such it will be a valuable resource for students and scholars of Middle East Politics as well as those with an interest in the Arab Spring
