Teaching and Learning Literacy David Wray, 2012-09-10 David Wray offers a range of practical suggestions for enhancing literacy work in primary and secondary schools KS 1-3. The book is based on the idea that the purpose of literacy teaching is to enable pupils to understand and create meaningful whole texts. It deliberately takes a cross curricular view of literacy and will appeal to teachers who specialize in a range of subjects. It also explores in depth the processes involved in both understanding and composing a range of text types, avoiding the temptation to segment literacy skills thereby losing sight of the overall purpose. The book is aimed at primary teachers and student teachers with an interest in extending their pupils' experiences of texts across the curriculum and at secondary teachers, especially English teachers who wish to include in their subject teaching more explicit attention to their pupils' literacy skills. **Science Education Research and Practice in**

Asia-Pacific and Beyond Jennifer Yeo, Tang Wee Teo, Kok-Sing Tang, 2017-10-16 This book is based on presentations at the International Science Education Conference ISEC 2014. It showcases a selection of the best papers by researchers and science teachers from the Asia Pacific region, North America and the United Kingdom. Centered on the theme of Pushing the boundaries, Investing in our future, they pursue new ways of helping learners appreciate the diversity and changes in science that result from a globalised world facing complex and diverse environmental and technological issues. The chapters touch on various themes in science education that explore and investigate issues of scientific literacy, societal challenges and affect and teacher professional development. Its comprehensive themes make it a valuable textbook for graduate students of master's and Ph.D. programs. It also appeals to pre-service and in-service teachers as a resource on innovative pedagogical practices and creative methods of professional development. With a selection that emphasises the research-practice nexus in education research, it serves as an introductory handbook for teachers to connect with the current issues facing science education.
