The Future of Disaster Management in the U.S. Amy LePore, 2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds

Of Rainfalls and Disasters Juan Manuel Rodríguez Esteves , Disasters associated with natural phenomena such as earth quakes floods droughts etcetera are intensifying damages that translate into deaths the loss of infrastructure and the interruption of economic activities The accelerated growth of cities frequently incorporates new areas that are susceptible to certain hazards leaving society increasingly exposed due to a mismanagement of land Since the 1990s the social sciences have developed the approach of vulnerability which considers the conditions of weakness of a society to cope with hazards We now know that risk is socially constructed and so disasters are not only a result of the intensity of the geophysical phenomena that unleash them but also of the contexts of vulnerability present when a phenomenon takes place The aim of this work is to show how the risk of flood disasters is constructed in Tijuana Baja California with four main elements as our starting point An examination of floods since the late 19th century the voice of the actors present for flooding events a theoretical model to understand the relationship between the hazard and the magnitude of the risk and recommendations for disaster risk management at a local level

Risk Analysis IX C. A. Brebbia, 2014-06-04 Containing papers presented at the 9th International Conference on Computer Simulation in Risk Analysis and Hazard Mitigation this book covers a series of important topics of current research interests and many practical applications It is concerned with all aspects of risk management and hazard mitigation

associated with both natural and anthropogenic hazards The analysis and management of risk and the mitigation of hazards is of fundamental importance to planners and researchers around the world We live in an increasingly complex society with the potential for disasters on a worldwide scale Natural hazards such as floods earthquakes landslides fires and others have always affected human societies Man made hazards however played a comparatively small role a few centuries ago until the risk of catastrophic events started to increase due to the rapid growth of new technologies The interaction of natural and anthropogenic risks adds to the complexity of the problem Topics covered include Risk assessment Risk management Hazard prevention management and control Early warning systems Risk mapping Natural hazards Disaster management Vulnerability assessment Health risk Debris flow and flood hazards Case studies Climate change Safety and security Evacuation simulation and design Political and economic vulnerability

Urban Disasters and Resilience in Asia Rajib Shaw,Atta-ur-Rahman,Akhilesh Surjan,Gulsan Ara Parvin,2016-01-06 Urban Disasters and Resilience in Asia presents the latest information on the intensity and frequency of disasters Specifically the fact that in urban areas more than 50% of the world s population is living on just 2% of the land surface with most of these cities located in Asia and developing countries that have high vulnerability and intensification The book offers an in depth and multidisciplinary approach to reducing the impact of disasters by examining specific evidence from events in these areas that can be used to develop best practices and increase urban resilience worldwide As urban resilience is largely a function of resilient and resourceful citizens building cities which are more resilient internally and externally can lead to more productive economic returns In an era of rapid urbanization and increasing disaster risks and vulnerabilities in Asian cities Urban Disasters and Resilience in Asia is an invaluable tool for policy makers researchers and practitioners working in both public and private sectors Explores a broad range of aspects of disaster and urban resiliency including environmental economic architectural and engineering factors Bridges the gap between urban resilience and rural areas and community building Provides evidence based data that can lead to improved disaster resiliency in urban Asia Focuses on Asian cities some of the most densely populated areas on the planet where disasters are particularly devastating
