Instructional Design for Organizational Justice Lisa A. Giacumo, Steven W. Villachica, Donald A. Stepich, 2024-07-24 Instructional Design for Organizational Justice prepares

instructional designers to use culturally relevant performance based learning materials and environments that improve organizational and workplace learning experiences for today's diverse globalized contexts. With socially just leadership and DEI initiatives growing in institutions across sectors, today's instructional design programs must prepare graduate students to be more culturally relevant, equity minded and inclusive in their professional practice. This textbook explores the implementation of systematic, systemic and performance oriented designs alongside the use of organizational justice theory to facilitate more equitable, inclusive performance improvement and workplace learning interventions. The book introduces the Learning and Performance Support Instructional Design Leaps ID Model, applicable to instructional designers, educational technologists, learning experience designers, learning engineers and human resource development professionals. This original iterative process integrates common ID heuristics, design based thinking, culture, equity, inclusion and other inputs external to the organization and ID project. It portrays a realistic, scalable, iterative, agile approach to the ID process, aids in the design of environments in which adult learners can observe practice and receive feedback, building the knowledge and capacity required for their desired performance and is illustrated by a wealth of examples, templates and processes developed in the field to support adult learners and collaborate with subject matter experts. Relevant to business, government, military, non profit, non governmental and higher education settings, this unique and comprehensive volume lends itself to uncovering values and motives essential to successful agile project management as well as to diversity, equity and inclusion initiatives and social change.

Learning Design Rob Koper, Colin Tattersall, 2005-12-28. E learning is still in its infancy. This can be seen both in the limited pedagogical quality and lack of portability of e learning content and in the lack of user friendly tools to exploit the opportunities offered by current technologies. To be successful, e learning must offer effective and attractive courses and programmes to learners while at the same time providing a pleasant and effective work environment for staff members who have the task to develop course materials, plan the learning processes, provide tutoring and assess performance. To overcome these deficiencies, the IMS Global Learning Consortium Inc released the Learning Design Specification in 2003. With Learning Design, it is possible to develop and present advanced, interoperable e learning courses embracing educational role and game playing methods, problem based learning, learning community approaches, adaptivity and peer coaching and assessment methods. In this handbook, Koper and Tattersall have put together contributions from members of the Valkenburg Group, consisting of 33 experts deeply involved in e learning and more specifically learning design. The result is a rich and lasting source of information for both e learning course and tool developers, providing information about the specification itself, how to implement it in practice, what tools to use and what pitfalls to avoid. The book not only reports first experiences but also goes beyond the current state of the art by looking at future prospects and emerging applications.

Written by Clare Delany and Elizabeth Molloy, each chapter weaves together education theory, education strategies, and illustrative learning and teaching case scenarios drawn from multidisciplinary clinical contexts. The text supports clinicians and educators responsible for designing and delivering health professional education in clinical workplaces and clinicians undertaking continuing education in workplace teaching. The book is divided into four sections, each addressing a key aspect of the learner and educator experience. Section 1 considers the learner's needs as they make key transitions from classroom to workplace or recent graduate to competent clinician. Section 2 focuses on the influence of workplace contexts and how they can be used as positive catalysts to enhance learning. Section 3 highlights the role of workplace assessments as embedded processes to positively influence learning. Section 4 provides an overview of the changing roles of the clinical educator and processes and models of professional development to build educational expertise. Demonstrates the integrated nature of three key threads within the field of clinical education: theory, method, and context. Highlights theoretical
