To expand the open access publishing project of our newly founded company MDPI [1,2] based in Basel, Switzerland, we are in the process of launching new journals. Based on our success in running journals that represent key areas in science and technology, such as *Molecules* [3], *Sensors* [4], *Energies* [5], *Viruses* [6], *Pharmaceuticals* [7], *Cancers* [8] and *Toxins* [9], we are launching a new journal entitled *Cells*. It is an open access journal combining cell biology, molecular biology and biophysics, toward an understanding of cell structure, function and interactions.

Cells are the basic unit of an organism, just like the molecules in a bulk phase of a substance. As a chemist, I have been interested in the assembly and interaction of molecules to spontaneously form certain structures, for example, unit cells in crystals [10], and I worked hard to offer a new theory to explain the phenomena that “birds of the same feathers flock together” [11,12]. Just yesterday evening, I was watching a TV program with my son about sponges, where the interesting aggregation of dissociated sponge cells was shown [13]. According to standard thermodynamic textbooks, different cells or different molecules aggregate to form a mixture due to the entropy of mixing; this unfortunately does not explain why a large number of the same cells, and a large number of the same molecules, would like to aggregate. The interaction of cells or the collective behavior of aggregated cells to form tissues, organs and organisms will be one of the most important topics to be covered by this journal.

Unlike other open access journals operated by MDPI where there is an Editor-in-Chief for a journal, *Cells* will be managing edited by our in-house editor.

Enjoy publishing with us!

Scientific arguments and indeed arguments in most disciplines depend on visuals and other nontextual elements however most models of argumentation typically neglect these important resources In *Assembling Arguments* Jonathan Buehl offers a concentrated study of scientific argumentation that is sensitive to both the historical and theoretical possibilities of multimodal persuasion as it advances two related claims First rhetorical theory when augmented with methods for reading nonverbal representations can provide the analytical tools needed to understand and appreciate multimodal scientific arguments Second science an inherently multimodal enterprise offers ideal subjects for developing general theories of multimodal rhetoric applicable across fields In developing these claims Buehl offers a comprehensive account of scientific persuasion as a multimodal process and develops a simple but productive framework for analyzing and teaching multimodal argumentation Comprising five case studies the book provides detailed treatments of argumentation in specific technological and historical contexts argumentation before World War I when images circulated by hand and by post argumentation during the mid twentieth century when computers were beginning to bolster scientific inquiry but images remained hand crafted products and argumentation at the turn of the twenty first century an era of digital revolutions and digital fraud Each study examines the rhetorical problems and strategies of specific scientists to investigate key issues regarding visualization and argument 1 establishing new instruments as reliable sources of visual evidence 2 creating novel arguments from reliable

visual evidence 3 creating novel arguments with unreliable visual evidence 4 preserving the credibility of visualization practices and 5 creating multimodal artifacts before and in the era of digital circulation Given the growing enterprise of rhetorical studies and the field's contributions to communication practices in all disciplines rhetoricians need a comprehensive rhetoric of science one that accounts for the multimodal arguments that change our relation to reality

Assembling Arguments argues that such rhetoric should enable the interpretation of visual scientific arguments and improve science writing instruction

As digital technologies are expanding the power and reach of research they are also raising complex issues These include complications in ensuring the validity of research data standards that do not keep pace with the high rate of innovation restrictions on data sharing that reduce the ability of researchers to verify results and build on previous research and huge increases in the amount of data being generated creating severe challenges in preserving that data for long term use

Ensuring the Integrity Accessibility and Stewardship of Research Data in the Digital Age examines the consequences of the changes affecting research data with respect to three issues integrity accessibility and stewardship and finds a need for a new approach to the design and the management of research projects The report recommends that all researchers receive appropriate training in the management of research data and calls on researchers to make all research data methods and other information underlying results publicly accessible in a timely manner The book also sees the stewardship of research data as a critical long term task for the research enterprise and its stakeholders Individual researchers research institutions research sponsors professional societies and journals involved in scientific engineering and medical research will find this book an essential guide to the principles affecting research data in the digital age **The Journal of Cell Biology**, 1994 No 2 pt 2 of November issue each year from v 19 47 1963 70 and v 55 1972 contain the Abstracts of papers presented at the annual meeting of the American Society for Cell Biology 3d 10th 1963 70 and 12th 1972 AMA Manual of Style The JAMA Network Editors, 2019-11-01 The AMA Manual of Style is a must have resource for anyone involved in medical health and scientific publishing Written by an expert committee of JAMA Network editors this latest edition addresses issues that face authors editors and publishers in the digital age Extensive updates are included in the References chapter with examples of how to cite digital publications preprints databases data repositories podcasts apps and interactive games and social media Full color examples grace the chapter on data display with newer types of graphic presentations and updated guidance on formatting tables and figures The manual thoroughly covers ethical and legal issues such as authorship conflicts of interest scientific misconduct intellectual property open access and public access and corrections The Usage chapter has been revised to bring the manual up to date on word choice especially in writing about individuals with diseases or conditions and from various socioeconomic racial ethnic and sexual orientation populations Specific nomenclature entries in many disciplines are presented to guide users in issues of diction formatting and preferred terminology Guidance on numbers SI units and math has been updated and the section on statistics and study design has undergone a major expansion In sum the answer to nearly any issue facing a writer or editor in medicine health care and related disciplines can be found in the 11th edition of the AMA Manual of Style Available for institutional purchase or subscription or individual subscription Visit AMAManualofStyle.com or contact your sales rep for more details *A Laboratory Guide to the Tight Junction* Jianghui Hou, 2020-04-24 A Laboratory Guide to the Tight Junction offers broad coverage of the unique methods required to investigate its characteristics The methods are described in detail including its biochemical and biophysical principles step by step process data analysis troubleshooting and optimization The coverage includes various cell tissue and animal models Chapter 1 provides the foundations of cell biology of tight junction Chapter 2 covers the Biochemical approaches for paracellular channels and is followed by chapter 3 providing the Biophysical approaches Chapter 4 describes and discusses Histological approaches for tissue fixation and preparation Chapter 5 discusses Light microscopy while chapter 6 presents
