Credit Rating Governance Ahmed Naciri, 2015-01-30 Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis, their power and reliability were often questioned, yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies as expressed by their ability to fairly, ethically, and consistently assign higher rates to issuers having lesser default risks. However, factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity, and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance, financial economics, risk management, investment management, and banking.

Race, Economics, and the Politics of Educational Change John M. Amis, Paul M. Wright, 2024-01-12 The 2010 national midterm elections produced Republican majorities in Tennessee for the first time since Reconstruction In the wake of that election leaders of the Shelby County Schools SCS school district began legislative maneuvering to advance a long cherished goal granting their schools special school district status a move that would permanently sever the relationship between the SCS and the other school district in the county Memphis City Schools MCS Leaders of MCS realized this action would deprive it of funding from a significant part

of the county's tax base. So they made a stunning move of their own: they renounced the MCS charter. Ironically, under Tennessee law, this action required SCS to take over the running of Memphis's schools. SCS would actually be forced to merge with MCS. Thus began the largest school district consolidation in the history of the United States.

Race, Economics, and the Politics of Educational Change progresses through nine chapters that examine the MCS/SCS merger from a variety of disciplinary perspectives: Historical, sociological, political, legal, institutional, urban planning, media studies, and educational analyses of the consolidation. John M. Amis and Paul M. Wright's volume is a valuable tool for researchers, students, policy makers, and educators alike. The investigations in this work reveal deeply entrenched inequalities that have thwarted education, particularly for poor minority students throughout the region's history. This text presents insight into factors that have shaped not just the school system in Shelby County but similar systems across the United States. A model for other urban areas that face similar challenges, this volume will serve as a significant resource for those seeking to understand the trajectory of large-scale educational transformations.
