**Conceptual Maths** Peter Mattock,2023-04-05 Written by Peter Mattock Conceptual Maths Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain constant whenever they are encountered but which combine and build upon each other to create the mathematical universe It is the structure of each concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands In his first book Visible Maths Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures His aim in Conceptual Maths is to go deeper beyond the procedures and to shed greater light on the structures of the subject s different concepts The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils understanding of mathematical structures concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed Conceptual Maths also includes a glossary covering the key mathematical terms Suitable for teachers of maths in primary secondary and post 16 settings Universities and Innovation Economies Peter Murphy,2016-02-24 Students drop out of universities in large numbers many graduate to jobs that do not require a degree and a large number learn little at university whilst graduate salaries have shrunk over time and student loan debt and default have grown University research achievements have declined while university administration has expanded massively The contemporary university is mired in auditing regulation waste and aimlessness and its contribution to serious social innovation has deteriorated markedly The miserable state of the universities reflects a larger social reality as bureaucratic capitalism has replaced creative capitalism Universities and Innovation Economies examines the rise and fall of the mass university and post industrial society considering how we might revitalize economic and intellectual creativity Looking to a much more inventive social and economic paradigm to drive long term growth the author argues for a smaller leaner more effective university model one capable of delivering a greater degree of high level discovery and creative power A potent critique of the post industrial mass university that urges a reimagination of universities as places of discovery and invention this book will appeal

to readers interested in higher education creativity social theory the sociology of work and organisations political economy pedagogy and public policy

**The Sociopolitics of English Language Testing** Seyyed-Abdolhamid Mirhosseini, Peter De Costa, 2020-02-20 Highlighting marginalized but significant perspectives about the sociopolitical essence of English language tests and testing processes worldwide this book explores the social considerations of testing theories and practices from a critical perspective Investigating concerns surrounding power inequalities The Sociopolitics of English Language Testing takes a socially situated view of language assessment bringing sociopolitical understandings of language teaching learning and assessment to the forefront in the field Within the broader discussion of the politics of test use an international team of language and education experts address the issues of ideology diversity power and dominance in English language testing Through socially sensitive theoretical as well as empirical discussion and investigation of English language testing this book offers valuable insights not only to applied linguists and the language education community who have focused on positivistic and cognitively oriented conceptions of language testing but to anyone who wishes to venture beyond the traditional bounds of the field

Shadow Networks Francisco Louçã, Michael Ash, 2018-10-03 The 2007 08 financial crisis surprised many economists and the public But how did the crisis come about why was it so deep and why has the clean up been so slow and painful Many accounts of the crisis focus on renegade activity in marginal financial sectors

Shadow Networks challenges this pervading view and sets out to demonstrate that far from a dissident branch the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank based finance The collapse was not an accident but baked into the system of finance from the start Shadow Networks traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade long crisis took shape Shadow Networks Financial Disorder and the System that Caused Crisis is a probing examination of the roles of the powerful elite It traces the networks and institutions that support a finance focused market centered model of economy and society from their ascendancy to their surprising resilience in the face of manifest failures ACCA - F4 Corporate & Business Law (Russia) (for the December 2017 and June 2018 exams) Becker Professional Education, 2017-08-01 Becker s F4 Corporate Business Law Russia Revision Question Bank includes the most recent ACCA examinations with suggested answers past examination questions updated where relevant model answers and suggested solutions and tutorial notes **Smart Cities Policies and Financing** John R.
