**Possible Scenarios for Homochirality on Earth** Michiya Fujiki, 2019-11-14 In 1978 Fred Hoyle proposed that interstellar comets carrying several viruses landed on Earth as part of the panspermia hypotheses With respect to life the origin of homochirality on Earth has been the greatest mystery because life cannot exist without molecular asymmetry Many scientists have proposed several possible hypotheses to answer this long standing L D question Previously Martin Gardner raised the question about mirror symmetry and broken mirror symmetry in terms of the homochirality question in his monographs 1964 and 1990 Possible scenarios for the L D issue can be categorized into i Earth and exoterrestrial origins ii by chance and necessity mechanisms and iii mirror symmetrical and non mirror symmetrical forces as physical and chemical origins These scenarios should involve further great amplification mechanisms enabling a pure L or D world

**Organic Chemistry: The Name Game** Alex Nickon, Ernest F. Silversmith, 2013-10-22 Organic Chemistry The Name Game Modern Coined Terms and their Origins is a lighthearted take on the usually difficult and systematic nomenclature found in organic chemistry However despite the lightheartedness the book does not lose its purpose which is to serve as a source of information on this particular subject of organic chemistry The book arranged into themes discusses some organic compounds and how they are named based on their structure makeup and components The text also explains the use of Greek and Latin prefixes in nomenclature and many other principles in nomenclature The book also includes an appendix that contains very useful information on nomenclature such as the etymology of certain element and chemical names numerical prefixes and the Greek alphabet The text is not only for students who wish to be familiarized with a different style of organic chemistry nomenclature but also for professors who aim to give students an enjoyable yet memorable learning experience
