## 291 Words Short Essay on Knowledge Is Power

Article shared by Manish

The main difference between a man and an animal is that man has some **knowledge** but an animal has no knowledge of anything. Knowledge is the godmother of all discoveries, explorations and inventions.

Mostly man gains knowledge through observation and experimentation. At first man starts with certain hypothesis or theory and sometimes even without any premeditation, prerequisite or predetermination. In other words, he embarks upon a project just at random and the results are startlingly positive or negative.

Einstein, for instance, was actually not working for discovering the atom when he stepped upon it just by chance. Even Newton's sight of the falling apple and the thoughts that it generated in his mind which led to the discovery of the theory of gravitation were not far conceived by him.

All the modern technology which has made certain nations so powerful economically and militarily is all based on knowledge. In countries like the USA research in all fields of science is done on regular basis and

Christoph Moss, 2021-04-13 Breaking down barriers creating transparency in digital communication and effectively targeting different audiences is critical to today's successful organisations. Establishing a Corporate Newsroom is the answer. The first part discusses the different theoretical approaches of communication and the corporate newsroom model. Special emphasis is given to efficiency and effectiveness as the main pillars of this strategy. The second part presents case studies to illustrate how the corporate newsroom system can be used in the communication departments of organisations. The authors discuss real life examples from Swiss Life Germany and the Dutch Police among others and show how the corporate newsroom method impacted communication strategies and results in these organisations. This book will be of interest not only for PR professionals but also for marketing specialists and business leaders trying to bring corporate communication to the next level.

*Essays on Spinoza's Ethical Theory* Matthew J. Kisner, Andrew Youpa, 2014-04-17 Thirteen original essays by leading scholars explore aspects of Spinoza's ethical theory and in doing so deepen our understanding of the richly rewarding core of his system. Given its importance to his philosophical ambitions, it is surprising that his ethics has until recently received relatively little scholarly attention. Anglophone philosophy has tended to focus on Spinoza's contribution to metaphysics and epistemology, while philosophy in continental Europe has tended to show greater interest in his political philosophy. This tendency is problematic not only because it overlooks a central part of Spinoza's project but also because it threatens to present a distorted picture of his philosophy. Moreover, Spinoza's ethics, like other branches of his philosophy, is complex, difficult, and at times paradoxical. The essays in this volume advance our understanding of his ethics and also help us to appreciate it as the centerpiece of his system. In addition to resolving interpretive difficulties and advancing longstanding debates, these essays point the direction for future research. Spinoza's enduring contribution to the development of ethical theory to early modern philosophy and indeed to early modern history generally provide us with good reason to follow the lead of these essays.

*The Tree of Knowledge and Other Essays* Wright, 2021-09-20 In an autobiographical introduction, the author tells about the two forces which have shaped his intellectual life: philosophy as an academic profession and philosophy as a search for a view of life. The book accordingly divides into two parts. The essays in the first part survey developments in logic and analytical philosophy in the perspective of the closing century and in the light of the author's long experience and participation in them. There are also essays on Musil's criticism of Mach, on the Finnish philosopher Eino Kaila's search for a monistic world view, and on Wittgenstein's place on the cultural map of the century. The papers in the second part deal with traits of contemporary civilization which have become problematic thanks to the impact of technological developments on political and social forms of life. Humanism, modernity, and scientific rationality are key ideas taken up for critical scrutiny.
