

Chapter 2- exercises

1. Wined is a viticultural who produces wine from grapes grown on his own property. Which of Wined's assets is subject to IAS 41?
 - a. Theo 4,000 tons of grapes in the holding bay waiting to be processed into wine.
 - b. The 400 hectares of land that was acquired by Wined's great-grand-father.
 - c. The 3,500,000 bottles of wine stored in a refrigerated warehouse holding the produce last year's yield.
 - d. **The 300,000 grape vines that have been producing grapes for 4 generations of Wined's family.**
2. Masan owned cattle recorded in the financial statements at \$5,250 on 1 January 20X4. At 31 December 20X4 the cattle have a fair value of \$6,500. If Masan sold the cattle, commission of 2% would be payable. What is the correct accounting treatment for the cattle at 31 December 20X4 according to IAS 41 Agriculture?
 - a. Hold at cost of \$5,250.
 - b. Revalue to \$6,500, taking gain of \$1,250 to the statement of profit or loss.
 - c. Revalue to \$6,500, taking gain of \$1,250 to the revaluation surplus.
 - d. **Revalue to \$6,370, taking gain of \$1,120 to the statement of profit or loss.**

$6500 \times 0.98 = 6370$

Fair Value – cost of sales, taking gain or loss to the statement of PnL

3. The following is an extract from the 2013 Annual Report of SIPEF NV:
Because of the inherent uncertainty associated with the valuation at fair value of the biological assets due to the volatility of the prices of the agricultural produce and the absence of a liquid market, their carrying value may differ from their realisable value. Given the inherent uncertainty in applying IAS 41, discuss whether the pre-IAS 41 practice of value at historical cost is preferable for the statement of financial position.
4. Agriculture is a key business activity in many parts of the world, particularly in developing countries. Following extensive discussions with, and funding from, the World Bank, the International Accounting Standards Committee (IASC) developed an accounting standard relating to agricultural activity. IAS 41 Agriculture was published in 2001 to apply to accounting periods beginning on or after 1 January 2003. Sigma prepares financial statements to 30 September each year. On 1 October 2003 Sigma carried out the following transactions:
 - Purchased a large piece of land for \$20 million.
 - Purchased 10,000 dairy cows (average age at 1 October 2003, two years) for \$1 million.
 - Received a grant of \$400,000 towards the acquisition of the cows. This grant was non-returnable. During the year ending 30 September 2004 Sigma incurred the following costs:
 - \$500,000 to maintain the condition of the animals (food and protection).
