

PHYSICAL KINETIC MOLECULAR THEORY

Learning Objectives

- to identify theoretical differences in how gases are represented in the kinetic theory and in real-world situations;
- to explain the relationship of the postulates of the kinetic molecular theory;
- to explain how molecular theory affects macroscopic behavior;
- to represent quantitative information using graphical or tabular representations.

Module 1: Representations of Gases in Different Phases

The following figure illustrates representations of a certain gas in three different phases of matter.

Figure 1. Representations of a certain gas in three different phases of matter.

Macroscopic properties represent collective properties of particles and systems. These properties can be used to describe the behavior of a system.

Key Concepts

- Effect of the type of representation of a system and the number of particles on the system, and the effect of the type of representation of a system on the behavior of the system (see Figure 1). The system can be used to describe the behavior of a system and the behavior of the system.
