oil is an extract made from the hemp plant which is a member of the cannabis family. Many of the stigmas surrounding cannabis oil come from a misunderstanding about the classification of the plant. Yes, cannabis does produce marijuana buds. No, this does not mean that CBD oil will get you high. In fact, CBD oil does not contain enough THC to get you high, which is the psychoactive component found in marijuana. CBD oil offers only the medicinal benefits. There has been a lot of gray area in the past few decades concerning the legality of CBD oil as well as the ethics that surround keeping it away from people it can truly help. CBD oil can treat everything from seizures to anxiety, helping hosts of people overcome medical conditions and go on to lead better lives. It even has benefits for the average user as it works with the endocannabinoid system to promote overall health. We'll get deeper into what the endocannabinoid system is in the book and how CBD works with it to help promote health. The misinformation stops now. As you read through this book, you will find a brief history on the legality and use of CBD oil over time. You will also learn about what CBD oil is, how it is extracted, and the many benefits. In the final chapter, you'll find some guidelines about where you can source CBD oil and how you can use it for your condition. Be informed, be free of pain. [Your Cannabis CBD:THC Ratio](#) Uwe Blesching, 2020-12-15. The author of the game-changing *Cannabis Health Index* returns with a book designed specifically for general readers who want to understand how THC and CBD can benefit them. While CBD is the new buzzword for health and wellness, many researchers and practitioners believe that the symbiotic relationship between THC and CBD, known as the entourage effect, allows for greater therapeutic benefits for patients. Unfortunately, when it comes to optimizing that ratio to a particular health condition, it is often a process of trial and error for medical patients. *Your Cannabis CBD:THC Ratio* provides detailed information on how to find the best ratios of CBD:THC and covers the preferred ratios of these two primary cannabinoids for ten prevalent medical conditions including cancer, chronic pain, anxiety, insomnia, and many others. Blesching's unique chemotype-based system takes into account CBD:THC ratios, the various forms of cannabis medicine available to consumers, and the subjective therapeutic dosages, presenting a complete evidence-based methodology.
