Anthropology's Interrogation of Philosophy from the Eighteenth to the Twentieth Century Jerome Fanning Marsden Carroll, 2017-12-06 Anthropology's Interrogation of Philosophy from the Eighteenth to the Twentieth Century presents and discusses key aspects of the German tradition of philosophical anthropology from the eighteenth to the twentieth century centering on the concept of anthropology as a study of the whole concrete man Heinrich Weber 1810 Philosophical anthropology appears during the last decades of the eighteenth century in the often practically oriented writings of men such as Ernst Platner Karl Wezel and Johann Herder and is then taken up in the twentieth century by thinkers including Max Scheler Helmut Plessner Arnold Gehlen and Hans Blumenberg In presenting this tradition the book serves two primary purposes Firstly it introduces English readers in a coherent manner to key aspects of a two hundred year tradition in German thought Secondly the book analyzes in an unprecedented manner even in German scholarship the connections between the philosophical debates associated with

anthropology at the end of the eighteenth century and ongoing philosophical issues in the twentieth century Specifically author Jerome Carroll argues that late eighteenth century anthropology diverges pointedly from traditional foundational approaches to philosophy for instance rejecting philosophy's quest for absolute foundations for knowledge or a priori categories and turning to a more descriptive account of man's being in the world Notably by drawing on the epistemological ontological and methodological aspects and implications of anthropological holism this book reads the philosophical significance of classical twentieth century anthropology through the lens of eighteenth century writings on anthropology

Phenomenal Blackness Mark Christian Thompson, 2022-01-21 This unorthodox account of 1960s Black thought rigorously details the field's debts to German critical theory and explores a forgotten tradition of Black singularity Phenomenal Blackness examines the changing interdisciplinary investments of key mid century Black writers and thinkers including the growing interest in German philosophy and critical theory Mark Christian Thompson analyzes this shift in intellectual focus across the post war decades placing Black Power thought in a philosophical context Prior to the 1960s sociologically oriented thinkers such as W E B Du Bois had understood Blackness as a singular set of socio historical characteristics In contrast writers such as Amiri Baraka James Baldwin Angela Y Davis Eldridge Cleaver and Malcolm X were drawn to notions of an African essence an ontology of Black being With these perspectives literary language came to be seen as the primary social expression of Blackness For this new way of thinking the works of philosophers such as Adorno Habermas and Marcuse were a vital resource allowing for continued cultural materialist analysis while accommodating the hermeneutical aspects of Black religious thought Thompson argues that these efforts to reimagine Black singularity led to a phenomenological understanding of Blackness a Black aesthetic dimension wherein aspirational models for Black liberation

Constitutional Culture, Independence, and Rights Javier Garcia Oliva, Helen Hall, 2023-05-26 In Constitutional Culture Independence and Rights Javier Garcia Oliva and Helen Hall coin the term constitutional culture to encapsulate the collective rules and expectations that govern the collective life within a jurisdiction Significantly these shared norms have both legal and social elements including matters as diverse as standards of parenting the modus operandi of police officers and taboos around sexuality Using Quebec Scotland and Catalonia as case studies the book delves into what these constitutional battles mean for the rights identity and needs of everyday people and it powerfully demonstrates why the hypothetical future independence of these regions would have far reaching practical consequences beyond the realm of political structures and academic theory The book does not present a magic bullet to resolve debates around independence this is not its purpose and the text in fact demonstrates why there is no objectively optimal approach in any or all contexts Instead it seeks to shed

light on aspects of these situations often overlooked in discussions around the fate of nations and it addresses what the consequences of constitutional paradigm shifts might be for individuals Constitutional culture is a complex web of interconnected understandings and behaviours and the vibrations from shaking or cutting a fundamental strand will be felt throughout the structure
