

Creating a One-line Diagram

The purpose of this tutorial is to show the fundamentals of building and manipulating a one-line diagram in ETAP. Various elements will be added to the one-line view (OLV), and an introduction to composite networks will be made. The figure below displays the one-line which we will create.

Creating a New Project

Start ETAP Demo and select the option "New Project" for this tutorial.

Etap Tutorial Manual:

Technical Report, 1983 **Ten Steps to Complex Learning** Jeroen J. G. van Merriënboer, Paul A. Kirschner, 2012-10-12
Ten Steps to Complex Learning presents a path from a training problem to a training solution in a way that students practitioners both instructional designers and teachers and researchers can understand and easily use Practitioners can use this book as a reference guide to support their design of courses materials or environments for complex learning Students in the field of instructional design can use this book to broaden their knowledge of the design of training programs for complex learning Now fully revised to incorporate the most current research in the field this second edition of Ten Steps to Complex Learning includes user friendly examples and case studies and demonstrates the application of the ten steps in relation to the design of serious games learning networks social media and new developments in educational neuroscience **Energy Research Abstracts**, 1992 **Instructional Technology** Robert M. Gagne, 2013-12-16 First Published in 1987 The technical knowledge that constitutes instructional technology includes practical procedures for using existing media to deliver instruction and also to deliver portions of instruction that supplement the communications of an instructor Instructional technology includes practical techniques of instructional delivery that systematically aim for effective learning whether or not they involve the use of media It is a basic purpose of the field of instructional technology to promote and aid the application of these known and validated procedures in the design and delivery of instruction **Instructional Design: Theory, research, and models** Robert D. Tennyson, S. Dijkstra, 1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company **Instructional Models in Computer-Based Learning Environments** Sanne Dijkstra, Hein P.M. Krammer, Jeroen J.G. van Merriënboer, 2013-11-11 In the last decade there have been rapid developments in the field of computer based learning environments A whole new generation of computer based learning environments has appeared requiring new approaches to design and development One main feature of current systems is that they distinguish different knowledge bases that are assumed to be necessary to support learning processes Current computer based learning environments often require explicit representations of large bodies of knowledge including knowledge of instruction This book focuses on instructional models as explicit potentially implementable representations of knowledge concerning one or more aspects of instruction The book has three parts relating to different aspects of the knowledge that should be made explicit in instructional models knowledge of instructional planning knowledge of instructional strategies and knowledge of instructional control The book is based on a NATO Advanced Research Workshop held at the University of Twente The Netherlands in July 1991 **Training Complex Cognitive Skills** Jeroen J. G. van Merriënboer, 1997 *Annual Department of Defense Bibliography of Logistics Studies and Related Documents* United States. Defense Logistics Studies Information Exchange, 1982 **Handbook of Task Analysis Procedures** David H Jonassen, Wallace Hannum, Martin Tessmer, 1989-06-26 Task Analysis is not only the most important component of Instructional Design but also the most often

misconstrued and poorly executed Starting with this premise these authors have developed a complete reference and instructional text on Task Analysis The Handbook of Task Analysis Procedures fulfills three distinct purposes As an overview of the field it presents a comprehensive collection of functions techniques and tools that can be used in a variety of settings Thirty five different procedures are cataloged and described in individual chapters Providing flowcharts and examples it is organized to instruct the reader on how to perform these techniques Finally all chapters have been consistently structured making it an ideal reference book Handbook of Task Analysis Procedures is designed to help the reader select a specific task analysis technique for a particular situation Having done this the reader can then refer to the appropriate chapter for his chosen technique This chapter provides a statement of purpose an overview and applications It then presents a step by step description of how to use the procedure The chapter concludes with examples an evaluation and a complete set of references Designed to be used in education and by trainers in the business sector this volume is a unique reference book Part I provides an overview of Task Analysis and describes the variables that affect how task analysis is performed A decision table and discussion help the reader select specific techniques The techniques are grouped in Part II III and IV according to their functional similarity learning analysis job analysis content analysis Part V describes information gathering tools This Handbook is essential for the reader who believes that competent task analysis is a vital part of instructional design

Extended Task Analysis Procedure Charles M. Reigeluth, M. David Merrill, 1984-09-04 **Technical Abstract Bulletin**, 1979 **Instructional Design Theories and Models** Charles M. Reigeluth, 1983-11-01 Instructional Design Theories and Models is a thorough yet concise overview of eight of the most comprehensive and best known attempts to integrate knowledge about effective and appealing instruction Chapters were written by the original theorists to provide a more accurate and behind the scenes look at the theories development Instructional Design *Biodiversity: my hotel in action: a guide to sustainable use of biological resources in the Caribbean*, *Instructional Design: International Perspectives I* Sanne Dijkstra, Franz Schott, Robert D. Tennyson, Norbert M. Seel, 2013-05-13 Instructional design theory and practice has evolved over the past 30 years from an initial narrow focus on programmed instruction to a multidimensional field of study integrating psychology technology evaluation measurement and management The growth of instructional design ID has occurred because of direct needs problems and goals from society Its application in planning instruction first developed in the United States with the Department of Defense during World War II with the purpose of meeting immediate concerns for effective training of larger numbers of military personnel From the beginning ID has rapidly expanded into applications in industrial and executive training vocational training classroom learning and professional education Although ID has its roots in the U S applications and theoretical growth is an international activity However literature at the international level is still limited to either individual author contributions or collections primarily represented by single countries As a result there is no standard reference source that contains the rich variety of theories and applications to form the international foundation

for the field The goal of this two volume set is to establish international foundations for ID theory research and practice within the framework of the two following objectives to identify and define the theoretical research and model foundations for ID and to bridge the gap between ID foundations and application Volume I includes chapters on philosophical and theoretical issues on learning theory and ID models Volume II provides an overview of the state of the art of solving ID problems The contributors offer contrasting points of view which provide a rare opportunity to see the diversity and complexity in the field The editorial committee has selected a wide range of internationally known authors to make presentations in the topic areas of the field *Administration & Management* ,1981 Handbook of Human Performance Technology Harold D. Stolovitch, Erica J. Keeps, 1992-04-10 In forty four original chapters leading researchers and practitioners offer a state of the art perspective on the evolving field of Human Performance Technology HPT a study of technologies designed to enhance human performance and capabilities in the workplace Tracing the historical roots of HPT this book explains its theoretical underpinnings and unveils an array of models and techniques that have proven effective in enhancing individual and organizational performance Energy Efficiency in Buildings José Manuel Andújar, Sergio Gómez Melgar, 2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO2 per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed
