

There are three changes in version 1.2 from the current released version: v1.1

- ### Custom Moving Light Personalities

Now it's possible to build up to 20 user personalities using that are stored with the show. The personalities can be built on-line, and this is probably the best way to ensure that they are working properly with the intended device. They are patched from the Patch Wizard as any other personality, and appear before the factory personalities. If they need to be edited after being patched - they must be repatched for the changes to be updated.

Step 1: Select the menu Patch Personalities
Menu>Patch>Patch Devices> [User Personalities]

```

[001]  DMX
[001]  [401]
User Personality
[201]

```

Use the encoder 2 to set the DMX address for the connected device to be able to test the personality live.

Step 2: Press **OK** to confirm. You will have a choice of **editing** an existing personality or **Erase & make a new one**. Make your selection with encoder 3.

	User Personality [Erase & make new]

Step 4: You are ready to edit/create the selected personality. There are two methods - live (with faders) and billed (in the display only). The easiest method is live with the device connected.
