

Ethics Outline

1. Ethics is concerned with any situation in which there is actual or potential harm to an individual or group. This harm may be physical or mental.
2. Ethics is the process of determining what are and what are not reasonable standards of moral conduct.
3. Determining standards considers three basic questions:
 - What is normally good or bad?
 - What is morally right or wrong?
 - What are my moral obligations, if any?
4. Ethics is a process of problem solving that tries to resolve actual or potential conflicts of interest.

Stakeholders

1. Firm should consider the impact of corporate decisions on all groups before a decision is reached. Any individual or group that may be impacted has a stake in the outcome.
2. The impact should be evaluated from a number of perspectives:
 - Are the rights of any stakeholder being violated?
 - Does the firm have any overriding duties to any stakeholders?
 - Will the decision benefit any stakeholder to the detriment of another stakeholder?
 - If there is detriment to any stakeholder, how should this be remedied, if at all?
 - What is the relationship between stockholders and other stakeholders?

Utilitarian Model

1. The utilitarian believes that the morally correct course of action is one that brings about the greatest good for the greatest number of people
2. Greatest group:
 - A. Pleasure and pain
 - B. Satisfaction of preference
 - C. Economic well being
3. Questions
 - What are the viable courses of action available? What are the alternatives?
 - What are the harms and benefits associated with the courses of action available?
 - Can these harms and benefits be measured? Can they be compared?
 - How long will these harms and benefits last?

Ethics Research Paper Outline:

An Introduction to Global Health Ethics Andrew Pinto, Ross Upshur, 2013-03-05 The field of global health is expanding rapidly. An increasing number of trainees are studying and working with marginalized populations often within low and middle income countries. Such endeavours are beset by ethical dilemmas, mitigating power differentials, addressing cultural differences in how health and illness are viewed, and obtaining individual and community consent in research. This introductory textbook supports students to understand and work through key areas of concern, assisting them in moving towards a more critical view of global health practice. Divided into two sections covering the theory and practice of global health ethics, the text begins by looking at definitions of global health and the field's historical context. It draws on anti-colonial perspectives, concepts developing social justice and solidarity as key principles to guide students. The second part focuses on ethical challenges students may face in clinical experiences or research. Topics such as working with indigenous communities, the politics of global health governance, and the ethical challenges of advocacy are explored using a case study approach. An Introduction to Global Health Ethics includes recommended resources and further readings and is ideal for students from a range of disciplines including public health, medicine, nursing, law, and development studies who are undertaking undergraduate and graduate courses in ethics or placements overseas.

Management Ethics Stewart R. Clegg, Carl Rhodes, 2012-11-12 Ethics has become big business, but have businesses become ethical? This is a central question for today's managers. Managing ethics is critical in an era characterized by unprecedented corporate power and a myriad of competing ethical traditions. Giving new insights into the understanding of ethics for today's organization practice and managerial behaviour, this timely volume, edited by well-respected industry authorities, provides an overview and critique of ethics as they relate to contemporary challenges and issues such as globalization, sustainability, consumerism, neo-liberalism, corporate collapses, leadership, and corporate regulation. This book is an essential read for postgraduate students of business and ethics, organized around the core question: What are the ethics of organizing in today's institutional environment, and what does this mean for the practice of management and the organization of business? In response to this, the contributors examine ethics as it is deeply embedded in the everyday practice of management. Interdisciplinary contributions from the fields of sociology, philosophy, management, organization studies, and public administration provide unique perspectives, while case studies and real-life examples illustrate the challenges and dilemmas faced in practice. Each chapter has a brief overview and editor's introduction which skilfully summarizes key points and draws connections between the chapters.
