A student wrote a response to the prompt below. Read the prompt, and then click Next.

Amy had two different types of erasers: one pink and hard, the other grey and soft. She wanted to find out if one of them would take fewer strokes to erase a word than the other. She thought of several variables that she needed to consider. Which of the variables should Amy allow to vary in her experiment if she is to get a good answer to her question? Explain.

Amy's List of Variables

<ul style="list-style-type: none"> 1 Type of eraser 2 Type of pencil used 3 Type of paper used 	<ul style="list-style-type: none"> 4 Length of words to be erased 5 Pressure on eraser while erasing 6 Pressure on pencil while writing

Next

Read the student's response, and then choose the appropriate score.

Everything should be the same in her experiment except for the type of eraser she uses if she wants it to remain a good experiment. She wants to test the erasers so that is the only thing she should test to keep it fair.
