The manufacturer cannot be responsible for accidents or injuries for failure to follow the instructions or for damage of any kind resulting from the use of this data sheet.

**Abstract**

To avoid the possibility of personal injury and/or property damage, it is important that safe working practices be observed. The following are accepted, but not limited, examples of such practices:

Before entering a meeting, an attendee should assess your own level of involvement and, if you cannot tolerate it, try to reduce this. These criteria will be the proper disposition of any early leave (LAWRENCE). This involves your ability to leave your seat and go to the office or home. If you are not in the office, you will not be able to use the current meeting structure. It is extremely important that the current technology evaluation of early leave be given priority in the completion of service. Failure to do so will create a potential system, process.

- Focus on returning the product to service, assume that:
  - All source components are critical and unique
  - All electronic items are properly stored and isolated away from sharp edges
  - High temperature components, and heating parts
  - All production electrical terminals, connectors, feeders, etc. are adequately spaced away from all other parts and wires.
  - All safety grounds, both internal and external are correctly and securely connected.

1. Turn power off before removing the blower screen.
2. Open the blower in the fully opened position.
3. Loosen grille screw on each side of blower, and lift or the left grille back and push them in the right grille back (see Figure 1).
4. Push the blower screen from the inside.

1. Push the bearing glides to the front of the drawer glide (see Fig. 2).
2. Align the pins on each side of the drawer with the pins on the frame.
3. Push the drawer into the range and leave it "closed" approximately 1/2". Push the drawer open again to seat bearing glides into position. If you do not hear the "click" (i.e. the bearing glides do not feel seated) remove the drawer and repeat steps 1 & 2. This will increase pressure for glides to fit bearing grooves.
