

A key principle has been established in Unit 10 that any object's position, velocity, acceleration, or momentum can be determined at any time by using the appropriate kinematic equation. The relationship between the object's position, velocity, acceleration, and momentum can be determined by using the appropriate kinematic equation.

The unit is presented with the following materials in order to determine the relationship between the object's position, velocity, acceleration, and momentum.

Materials

- Ball
- Stopwatch
- Ruler
- Graph paper

Procedure

You and your group will need to determine the relationship between the object's position, velocity, acceleration, and momentum by using the appropriate kinematic equation.
