John Dewey, 2015-06-11 The book *Human Nature and Conduct* by John Dewey does not purport to be a treatment of social psychology. But it seriously sets forth a belief that an understanding of habit and of different types of habit is the key to social psychology while the operation of impulse and intelligence gives the key to individualized mental activity. But they are secondary to habit so that mind can be understood in the concrete only as a system of beliefs, desires, and purposes which are formed in the interaction of biological aptitudes with a social environment.

John Dewey 1859-1952 author of *Human Nature and Conduct*. The *Introduction to Social Psychology* was an American philosopher, psychologist, and educational reformer whose ideas have been very influential to education and social reform. John Dewey asserted that complete democracy was to be obtained not just by extending voting rights but also by ensuring that there exists a fully formed public opinion accomplished by effective communication among citizens, experts, and politicians, with the latter being accountable for the policies they adopt.

John Dewey's most significant writings were *The Reflex Arc Concept in Psychology* (1896) a critique of a standard psychological concept and the basis of all his further work; *Democracy and Education* (1916) his celebrated work on progressive education; *Human Nature and Conduct* (1922) a study of the function of habit in human behavior; *The Public and its Problems* (1927) a defense of democracy written in response to Walter Lippmann's *The Phantom Public*; (1925) *Experience and Nature*; (1925) John Dewey's most metaphysical statement *Art as Experience*; (1934) John Dewey's major work on aesthetics *A Common Faith*; (1934) a humanistic study of religion originally delivered as the Dwight H. Terry Lectureship at Yale; *Logic: The Theory of Inquiry* (1938) a statement of John Dewey's unusual conception of logic; *Freedom and Culture* (1939) a political work examining the roots of fascism; and *Knowing and the Known* (1949) a book written in conjunction with Arthur F. Bentley that systematically outlines the concept of trans-action which is central to his other works.

While each of these works focuses on one particular philosophical theme, John Dewey included his major themes in most of what he published. John Dewey published more than 700 articles in 140 journals and approximately 40 books. His main interests were Philosophy of education, Epistemology, Journalism, and Ethics.

Human Nature And Conduct John Dewey, 2020-10-28 *Human Nature And Conduct* John Dewey Give a dog a bad name and hang him. Human nature has been the dog of professional moralists and consequences accord with the proverb. Man's nature has been regarded with suspicion, with fear, with sour looks, sometimes with enthusiasm for its possibilities but only when these were placed in contrast with its actualities. It has appeared to be so evilly disposed that the business of morality was to prune and curb it; it would be thought better of if it could be replaced by something else. It has been supposed that morality would be quite superfluous were it not for the inherent weakness bordering on depravity of human nature. Some writers with a more genial conception have attributed the current blackening to theologians who have thought to honor the divine by disparaging the human. Theologians have doubtless taken a gloomier view of man than have pagans and secularists. But this explanation doesn't take us far. For after all these theologians are themselves human and they would have been without influence if the human audience had not somehow responded to them.

Morality is largely concerned with controlling human nature. When we are attempting to control anything we are acutely aware of what resists us. So moralists were led perhaps to think of human nature as evil because of its reluctance to yield to control its rebelliousness under the yoke. But this explanation only raises another question: Why did morality set up rules so foreign to human nature? The ends it insisted upon, the regulations it imposed, were after all outgrowths of human nature. Why then was human nature so averse to them? Moreover, rules can be obeyed and ideals realized only as they appeal to something in human nature and awaken in it an active response. Moral principles that exalt themselves by degrading human nature are in effect committing suicide. Or else they involve human nature in unending civil war and treat it as a hopeless mess of contradictory forces. We are forced therefore to consider the nature and origin of that control of human nature with which morals have been occupied. And the fact which is forced upon us when we raise this question is the existence of classes. Control has been vested in an oligarchy. Indifference to regulation has grown in the gap which separates the ruled from the rulers. Parents, priests, chiefs, social censors have supplied aims, aims which were foreign to those upon whom they were imposed. To the young laymen, ordinary folk, a few have given and administered rule and the mass have in a passable fashion and with reluctance obeyed. Everybody knows that good children are those who make as little trouble as possible for their elders and since most of them cause a good deal of annoyance they must be naughty by nature. Generally speaking, good people have been those who did what they were told to do and lack of eager compliance is a sign of something wrong in their nature.

Human Nature and Conduct, 1930 Human Nature and Conduct John Dewey, 2015-07-07 Excerpt from *Human Nature and Conduct* An Introduction to Social Psychology. In the spring of 1918 I was invited by Leland Stanford Junior University to give a series of three lectures upon the West Memorial Foundation. One of the topics included within the scope of the Foundation is Human Conduct and Destiny. This volume is the result as according to the terms of the Foundation the lectures are to be published. The lectures as given have however been rewritten and considerably expanded. An Introduction and Conclusion have been added. The lectures should have been published within two years from delivery. Absence from the country rendered strict compliance difficult. Perhaps the subtitle requires a word of explanation. The book does not purport to be a treatment of social psychology. But it seriously sets forth a belief that an understanding of habit and of different types of habit is the key to social psychology while the operation of impulse and intelligence gives the key to individualized mental activity. But they are secondary to habit so that mind can be understood in the concrete only as a system of beliefs, desires and purposes which are formed in the interaction of biological aptitudes with a social environment.
