A Generation of Radical Educational Change Richard Pring, Martin Roberts, 2015-12-14 How much have teachers and their pupils benefitted from the top down Westminster led control of policy held in place by a powerful national inspection regime A Generation of Radical Educational Change Stories from the Field is an exploration of the revolutionary impact of the greater and continuing involvement of central government in education policy making which began in 1976 and was accelerated by the 1988 Education Act and subsequent legislation In the book a dozen distinguished contributors from a wide range of sectors explain and reflect on how they worked to do their best for their schools teachers and pupils in these years of great change They understand the reasons explained by Lord Baker in his early chapter for a National Curriculum in 1988 and also the reasons for a more effective national inspection system Yet their stories accumulate to become a powerful critique of the top down policies of the last two decades These policies have been too numerous short term incoherent and partisan governments have been indifferent to professional opinion and serious research and have relied excessively on measurable outcomes and simplistic Ofsted judgments Our current system is narrower and less democratic than it was but evidence is hard to find that English pupils are doing any better in international comparisons The combined reflections in this volume are timely in these years of lively educational debate as are the suggestions for future policy A Generation of Radical Educational Change is an invaluable read for current and aspiring headteachers policy makers and those with an interest in education policy and how it evolves

, 1871 **Radical-Local Teaching and Learning** Seth Chaiklin, Mariane Hedegaard, 2005-02-01 The cultural historical approach started in the 1930s by Lev Vygotsky who held that learning and instruction are the means to development is the foundation for the Radical Local Theory of Teaching and Learning formulated by Mariane Hedegaard and Seth Chaiklin in the first part of the book The central concern in this approach to education is how to integrate particular historical and cultural conditions that the children encounter into educational practices The second half of the book is an extensive case study of an after school programme for Puerto Rican primary students in East Harlem New York conducted in a radical local perspective This programme focussed on the history of the community and of Puerto Rican immigration and the study describes how it helped students become both more positive and more critical about their backgrounds By acquiring basic academic skills in a theoretical framework the children learn how to analyse their own local situation addressing not only immediate issues housing conditions family life community dynamics but also historical issues Unlike apparently similar culturally responsive approaches to teaching underprivileged children radical local teaching explicitly uses subject matter teaching to encourage children's development in relation to their social conditions Hedegaard and Chaiklin detail how they developed concrete lesson plans in a radical local perspective and enumerate the accomplishments as well as the difficulties they encountered in implementing this approach **Art Education as a Radical Act** Sara Torres-Vega, Wendy

Woon, 2024-05-20 This comprehensive volume highlights and centers untold histories of education at the Museum of Modern Art MoMA from 1937 to 2020 using the critical voices of artists scholars designers and educators Exploring these histories as transformative and paradigm shifting in museum education it elevates MoMA educators as vocal advocates for harnessing the educational power that museums inherently possess Divided into three interlinked parts the first sheds light on the early educational endeavors of the museum while analyzing the context of art education in the United States The second part focuses on the tenures of Victor D Amico and Betty Blayton utilizing the MoMA archives as a primary resource It includes essays by Ellen Winner Luis Camnitzer Susan E Cahan Michelle Millar Fisher HECTOR Jae Shin Damon Rich Gregory Sholette Carol Duncan Moreen Maser Nana Adusei Poku Carmen Mersch Rika Burnham Donna M Jones and Jos Ortiz The

third part presents the perspectives of William Burckhardt Philip Yenawine Patterson Sims Deborah F Schwartz and Wendy Woon as former MoMA Directors of Education in their own words and considers the forces that shaped their work This timely and unique exploration ultimately aims to trace and understand the fundamental and evolving concerns of a seemingly underexamined profession constantly striving to maintain relevance in an environment marked by institutional social and political uncertainty Exploring the radical acts undertaken to keep the museum true to its original promise it delineates the paradox whereby education is both central and invisible to the identity of MoMA and museums more broadly and re centers the conception of the museum as an educational institution It is designed for scholars researchers and post graduate students interested in arts education visual literacy museum studies and communication studies

Radical Spaces Christina Parolin,2010-12-01 RADICAL SPACES explores the rise of popular radicalism in London between 1790 and 1845 through key sites of radical assembly the prison the tavern and the radical theatre Access to spaces in which to meet agitate and debate provided those excluded from the formal arenas of the political nation the great majority of the population a crucial voice in the public sphere RADICAL SPACES utilises both textual and visual public records private correspondence and the secret service reports from the files of the Home Office to shed new light on the rise of plebeian radicalism in the metropolis It brings the gendered nature of such sites to the fore finding women where none were thought to gather and reveals that despite the diversity in these spaces there existed a dynamic and symbiotic relationship between radical culture and the sites in which it operated These venues were both shaped by and helped to shape the political identity of a generation of radical men and women who envisioned a new social and political order for Britain

Calvin and the Anabaptist Radicals Willem Balke,1999-10-13 The book has many fine features Dr Balke has done thorough research on his subject and presented its results in an excellent combination of chronological review and systematic analysis The principal significance of this book however is that it vindicates and in a sense rehabilitates John Calvin over against the Anabaptists and does so without perpetuating the unfair criticism of the Anabaptists which was prevalent for a long time The treatment is fair balanced and firm and of genuine historical value John H Kromminga President Calvin Theological Seminary

Radical Moves Caribbean Migrants and the Politics of Race in the Jazz Age **Radical Comedy in Early Modern England**

Rick Bowers,2016-04-08 Drawing on the generic and mythic strength of comedy and the theories of Bakhtin Bergson and Hobbes this book identifies the radical nature of early modern English comedy The satirical comedic actions that shape the *Shepherds Play* Thomas Dekker's pamphlets and the comic dramas of Marston Middleton and Jonson are all driven Bowers points out by an ability to criticize authority assert plebeian culture and insist on the complexity and innovation of human discourse The texts examined including *The Jew of Malta* *Metamorphosis of Ajax* Antonio and Mellida *Bartholomew Fair* *The Alchemist* and *A Chaste Maid in Cheapside* simultaneously create and employ standard comedic elements Farce absurdity excess over the top characters unrelenting irony black humor toilet humor and tricksters of all types such features and more combine to satirize medical religious and political authority and to implement necessary social change Written with a narrative ease **Radical Comedy in Early Modern England** shows how comic interventions both describe and reconfigure prevalent authority in its own time while arguing that through early modern comedy one can observe the changes in social behavior and understandings characteristic of the Renaissance **Radical Constructivism in Mathematics Education** E.

Glaserfeld,2006-04-11 Mathematics is the science of acts without things and through this of things one can define by acts 1 Paul Val ry The essays collected in this volume form a mosaic of theory research and practice directed at the task of spreading mathematical knowledge They address questions raised by the recurrent observation that all too frequently the present ways and means of teaching mathematics generate in the student a lasting aversion against numbers rather than an understanding of the useful and sometimes enchanting things one can do with them Parents teachers and researchers in the field of education are well aware of this dismal situation but their views about what causes the wide spread failure and what steps should be taken to correct it have so far not come anywhere near a practicable consensus The authors of the chapters in this book have all had extensive experience in teaching as well as in educational research They approach the problems they have isolated from their own individual perspectives Yet they share both an overall goal and a specific fundamental conviction that characterized the efforts about which they write here The common goal is to find a better way to teach mathematics The common conviction is that knowledge cannot simply be transferred ready made from parent to child or from teacher to student but has to be actively built up by each learner in his or her own mind **Stewart Headlam's**

Radical Anglicanism John Richard Orens,2010-10-01 Standing in stark contrast to the conservative churchmen of Victorian

Britain the Anglican clergyman Stewart Headlam was a passionately progressive reformer a champion of the working poor especially women a defender of the music hall performers his colleagues attacked as licentious and in short a man of God who remained firmly and controversially engaged with the society in which he lived and worked This book the first significant study of Headlam since 1928 paints a rich and complex picture of this larger than life man of the cloth charting the trail he blazed across the social political and religious landscape of late nineteenth and early twentieth century Britain Dissatisfied from an early age with his family's Evangelical faith Headlam became an Anglican curate but his political views were increasingly radicalized as he befriended working class atheists and trade union leaders John Richard Orens details Headlam's repeated conflicts with the establishment figures of his faith over his defense of music hall ballet performers right to reveal their legs his role in the early years of the Fabian Society his anti puritanism and his passionate socialism Headlam was even instrumental in having Oscar Wilde bailed out of prison following the writer's arrest for homosexual offenses With this intellectual biography Orens places Headlam's life beliefs and actions in the context of the period contributing to the ongoing debate about the proper relationship between Christianity on the one hand and society sexuality and the arts on the other

Steffe, Patrick W. Thompson, 2002-11-01 Over the last twenty five years Ernst von Glasersfeld has had a tremendous impact

on mathematics and science education through his fundamental insights into the nature of knowledge and knowing Radical Constructivism in Action is a new volume of papers honouring his work by building on his model of knowing The contributions by leading researchers present constructivism in action tying the authors actions regarding practical problems of mathematics and science education philosophy and sociology to their philosophical constraints giving meaning to constructivism operationally The book begins with a retrospective analogy between radical constructivism s emergence and changes in what is thought of as certain scientific knowledge It aims to increase understanding of constructivism and Glasersfeld s achievement and is vibrant evidence of the continued vitality of research in the constructivism tradition
