Integrated Project Delivery Ipd Guide:

Integrating Project Delivery Martin Fischer, Howard W. Ashcraft, Dean Reed, Atul Khanzode, 2017-02-27 A revolutionary collaborative approach to design and construction project delivery Integrating Project Delivery is the first book length discussion of IPD the emergent project delivery method that draws on each stakeholder s unique knowledge to address problems before they occur Written by authors with over a decade of research and practical experience this book provides a primer on IPD for architects designers and students interested in this revolutionary approach to design and construction With a focus on IPD in everyday operation coverage includes a detailed explanation and analysis of IPD guidelines and case studies that show how real companies are applying these guidelines on real world projects End of chapter questions help readers quickly review what they ve learned and the online forum allows them to share their insights and ideas with others who either have or are in the process of implementing IPD themselves Integrating Project Delivery brings together the owners architect engineers and contractors early in the development stage to ensure that problems are caught early and to address them in a collaborative way This book describes the parameters of this new more efficient approach with expert insight on real world implementation Compare traditional procurement with IPD Understand IPD guidelines and how they re implemented Examine case studies that illustrate everyday applications Communicate with other IPD adherents in the online forum The IPD approach revolutionizes not only the workflow but the relationships between the stakeholders the atmosphere turns collaborative and the team works together toward a shared goal instead of viewing one another as obstructions to progress Integrated Project Delivery provides a deep exploration of this approach with practical guidance and expert insight

Routledge Handbook of Integrated Project Delivery Derek Walker, Steve Rowlinson, 2019-07-26 The concept of integrated project delivery IPD has evolved as a result of the need for highly expert teams of people to collaborate to deliver extremely complex projects to manage expectations about delivery speed changes in governance standards and to take advantage of and manage expectations raised by rapid advances in technology All this demands effective change management This is the first Handbook to contextualise and thematically explore the concept with an emphasis on rigorous practical and theoretical validation The Handbook is divided into five sections each with a focus on several interconnected themes including An introduction to IPD concepts The foundational elements and characteristics of IPD People culture and collaboration as key ingredients to successful and effective IPD Technology and process aspects of relational contracting forms such as IPD New and relevant perspectives to IPD that have received scant attention to date Aspects and emerging issues that are rarely consciously considered in traditional project delivery due to the commercial imperative that drives firms and client organisations The Handbook offers both discussions of these key themes and also in depth research into construction and other industry project procurement and delivery that spans decades In addition the Handbook presents best and better practice but also includes insights into cutting edge experimental developments in technology and practices where proof of

concept is currently being developed into emerging practice Contributing authors in this Handbook collaborate with the co editors to draw together an integrated set of chapters that align to deliver a coherent narrative of the IPD concept It is an invaluable reference for practitioners and academics alike and useful as core course content for numerous degree programs of study and professional development courses

works as an exemplar the book sets out four features that the authors argue define the SIP form concept as follows The organisation delivers a program of projects many using an IPD contract variant form such as a Project Alliance Agreement PAA in Australia and numerous other countries or the Integrated Form of Agreement IFoA in North America The contract form adopted is used and has been strategically designed to accommodate the project s risk and uncertainty profile as is the case with the LXR Projects within the program are integrated with some being concurrently delivered with coordination across the projects in a coherent and highly purposeful manner Projects are not included that do not strategically fit the overall program delivery strategy There is a strategy for learning and innovation diffusion across projects concurrently and sequentially Lessons to be learned are learned through designed in governance mechanisms The LXR is a potentially unique program of projects and the book takes the reader on a journey through this complex program and after giving the background and relevant context covers topics such as strategy governance procurement collaboration program alliance HRM leadership digital innovation continuous improvement community engagement and performance measurement This detailed analysis of such a complex program of projects makes this book essential reading for project managers engineers and advanced students of project delivery and management
