Fayer, 2011 This unique volume presents a comprehensive but accessible introduction to the field of ultrafast two dimension infrared 2D IR vibrational echo spectroscopy based on the pioneering work of Professor Michael D Fayer Department of Chemistry Stanford University USA It contains in one place a qualitative introduction to the field of 2D IR spectroscopy and a comprehensive set of scientific papers that underlie the qualitative discussion The introductory material contains several detailed illustrations and is based on the Centenary Lecture at the Indian Institute of Science given by Professor Fayer July 16 2008 as part of the celebration of the 100th anniversary of the founding of IIS in Bangalore India The second part of the volume contains reprints of Fayer s relevant papers The compilation will be very useful because it presents the historical background motivation methodology and experimental results at a level that is accessible to the non expert The reprints of the scientific papers from review articles to detailed theoretical papers provide rigorous supporting material so that the reader can delve as deeply as desired into the subject **In Adamless Eden** Patricia Ann Palmieri, 1997-02-27 One of the most influential women s colleges in the country Wellesley has educated many illustrious women from Katharine Lee Bates author of *America the Beautiful* to Hillary Rodham Clinton Since its origins in the late nineteenth century Wellesley has had an impact on American history and women s history The college was unique in its commitment to an exclusively female faculty and much of its intellectual fervor can be traced back to them This book is an engrossing narrative history of that first generation of Wellesley professors Drawing on unpublished diaries journals family letters and autobiographies on newspapers and magazines and on official Wellesley College records Patricia Palmieri re creates and reinterprets the lives and careers of many of the fifty three senior women professors of the college By exploring the family culture education and ideology of the select few she accounts for the rise of the first generation of academic women in post Civil War America Examining Wellesley s social and intellectual milieu she radically revises standard accounts of the college as a citadel of enlightened domesticity between 1890 and 1920 She shows instead that its separatist women s community encouraged women students to renounce marriage and enter careers of public service and she links Wellesley s educational climate to the social reform activism of the Progressive Era In addition she argues that these academic women formed a collective fellowship which included many Wellesley marriages Ultimately society condemned Wellesley for its spinster faculty and by the 1930s the administration began to hire happily married men Nevertheless the contemporary college owes much to the dedication and achievement of its pioneering women scholars A Bibliographic Classification Henry Evelyn Bliss, 1953
