To Judge and To Justify Steve Fuller,2024-10-28 This book argues that judging and justifying are the two skills that specifically require academic training In the current times where the value of a university degree is increasingly questioned it s important to emphasize the significance of these skills This volume addresses that universities are not necessarily stressing these skills preferring instead to focus on the delivery of content and the provision of credentials Its main focus is on articulating the positive case for the university s focus on judging and explaining as its core transferable skills It involves examining the historical and philosophical case for this claim canvassing arguments made and the example set by Plato Francis Bacon Immanuel Kant

William Whewell Ludwig Wittgenstein Paul Feyerabend Richard Rorty John Rawls and Robert Nozick as well as considering how they might be realized in today's world This book extends the arguments in Fuller's recent book *Back to the University's Future: The Second Coming of Humboldt* Springer 2023 *Scientific Knowledge and the Transgression of Boundaries* Bettina-Johanna Krings, Hannot Rodríguez, Anna Schleisiek, 2016-11-30 The aim of this book is to understand and critically appraise science based transgression dynamics in their whole complexity It includes contributions from experts with different disciplinary backgrounds such as philosophy history and sociology Thus it is in itself an example of boundary transgression Scientific disciplines and their objects have tended to be seen as permanent and distinct However science is better conceived as an activity that constantly surpasses erases and rebuilds all kinds of boundaries either disciplinary socio ethical or ecological This transgressive capacity a characteristic trait of science and its applications defines us as knowledge societies However scientific and technological developments are also sources of serious environmental and social concerns **The International Encyclopedia of Communication Theory and Philosophy, 4 Volume Set** Klaus Bruhn Jensen, Robert T. Craig, Jefferson D. Pooley, Eric W. Rothenbuhler, 2016-10-31 The International Encyclopedia of Communication Theory and Philosophy is the definitive single source reference work on the subject with state of the art and in depth scholarly reflection on key issues from leading international experts It is available both online and in print A state of the art and in depth scholarly reflection on the key issues raised by communication covering the history systematics and practical potential of communication theory Articles by leading experts offer an unprecedented level of accuracy and balance Provides comprehensive clear entries which are both cross national and cross disciplinary in nature The Encyclopedia presents a truly international perspective with authors and positions representing not just Europe and North America but also Latin America and Asia Published both online and in print Part of The Wiley Blackwell ICA International Encyclopedias of Communication series published in conjunction with the International Communication Association Online version available at www.wileyicaencyclopedia.com The Routledge Companion to Philosophy of Social Science Lee McIntyre, Alex Rosenberg, 2016-12-08 37 Why Is There No Philosophy of Political Science The Past, Present, and Future of Integrated History and Philosophy of Science Emily Herring, Kevin Jones, Konstantin Kiprijanov, Laura Sellers, 2019-05-14 Integrated History and Philosophy of Science iHPS is commonly understood as the study of science from a combined historical and philosophical perspective Yet since its gradual formation as a research field the question of how to suitably integrate both perspectives remains open This volume presents cutting edge research from junior iHPS scholars and in doing so provides a snapshot of current developments within the field explores the connection between iHPS and other academic disciplines and demonstrates some of the topics that are attracting the attention of scholars who will help define the future of iHPS **The Academic Caesar** Steve Fuller, 2016-09-19 Aimed directly at those who aspire to be university leaders in these turbulent times and written as an academic counterpart to Machiavelli's *The Prince* The Academic Caesar explores four themes that

are central to the contemporary university its Caesar leaders its economics its disciplines and whether academics have a future in the universities Drawing on a wealth of experience writing about the social epistemology of higher education Steve Fuller makes a witty robust and provocative contribution to the ongoing debate about where the university has come from and where it is going The Academic Caesar will prove a fascinating read for those seeking new insights into current crisis in higher education as well as researchers and academics interested in the sociology of leadership The SAGE Handbook of the History, Philosophy and Sociology of International Relations Andreas Gofas, Inanna Hamati-Ataya, Nicholas Onuf, 2018-07-30 The SAGE Handbook of the History Philosophy and Sociology of International Relations offers a panoramic overview of the broad field of International Relations by integrating three distinct but interrelated foci It retraces the historical development of International Relations IR as a professional field of study explores the philosophical foundations of IR and interrogates the sociological mechanisms through which scholarship is produced and the field is structured Comprising 38 chapters from both established scholars and an emerging generation of innovative meta theorists and theoretically driven empiricists the handbook fosters discussion of the field from the inside out forcing us to come to grips with the widely held perception that IR is experiencing an existential crisis quite unlike anything else in its hundred year history This timely and innovative reference volume reflects on situated scholarly practices in a way that projects our collective thinking into the future PART ONE THE INWARD GAZE INTRODUCTORY REFLECTIONS PART TWO IMAGINING THE INTERNATIONAL ACKNOWLEDGING THE GLOBAL PART THREE THE SEARCH FOR AN IDENTITY PART FOUR INTERNATIONAL RELATIONS AS A PROFESSION PART FIVE LOOKING AHEAD THE FUTURE OF META ANALYSIS A Player's Guide to the Post-Truth Condition Steve Fuller, 2020-11-20 A Player's Guide to the Post Truth Condition The Name of the Game presents sixteen short readable chapters designed to leverage our post truth condition's deep historical and philosophical roots into opportunities for unprecedented innovation and change Fuller offers a bracing proactive and hopeful vision against the tendency to demonize post truth as the realm of fake news and bullshit Where others see threats to the established order Fuller sees opportunities to overturn it This theme is pursued across many domains including politics religion the economy the law public relations journalism the performing arts and academia not least academic science The red thread running through Fuller's treatment is that these domains are games that cannot be easily won unless one can determine the terms of engagement which is to say the name of the game This involves the exercise of modal power which is the capacity to manipulate what people think is possible Once the necessarily true appears to be only contingently so then the future suddenly becomes a more open space for action This was what frightened Plato about the alternative realities persuasively portrayed by playwrights in ancient Athens Nevertheless Fuller believes that it should be embraced by denizens of today's post truth condition **The Future of Social Epistemology** James H. Collier, 2015-12-02 The Future of Social Epistemology A Collective Vision sets an agenda for exploring the future of what we human beings reimagining our selves

and our society want need and ought to know The book examines concretely practically and speculatively key ideas such as the public conduct of philosophy models for extending and distributing knowledge the interplay among individuals and groups risk taking and the welfare state and envisioning people and societies remade through the breakneck pace of scientific and technological change An international team of contributors offers a collective vision one that speaks to what they see unfolding and how to plan and conduct the dialogue and work leading to a knowable and desirable world The book describes and advances an intellectual agenda for the future of social epistemology Social Epistemology and Technology Frank Scalabrino, 2015-12-16 How has technology changed what it means to be human and to be a member of a human society How has technology changed the way we acquire knowledge of the world we inhabit In light of these changes and the direction we are moving how should the pursuit of knowledge be organized Social Epistemology and Technology provides insights into such questions relating to public self awareness regarding technology The concerns addressed in this book apply to a large and diverse audience including but not limited to those interested in social epistemology technology cultural studies trans humanism augmented subjectivity futurology human sciences social sciences political sciences communication psychology science and technology studies and philosophy This is the first book of its kind to focus solely on technology and its socially specific epistemological themes It offers insight into public self awareness regarding technology by providing an understanding of persons in relation to the technological changes that have occurred and continue to occur across the societies they people **Knowing Humanity in the Social World** Francis X Remedios, Val Dusek, 2018-01-09 This book examines Fuller's pioneering vision of social epistemology It focuses specifically on his work post 2000 which is founded in the changing conception of humanity and project into a post or trans human future Chapters treat especially Fuller's provocative response to the changing boundary conditions of the knower due to anticipated changes in humanity coming from the nanosciences neuroscience synthetic biology and computer technology and end on an interview with Fuller himself While Fuller's turn in this direction has invited at least as much criticism as his earlier work to him the result is an extended sense of the knower or humanity 2.0 which Fuller himself identifies with transhumanism The authors assess Fuller's work on the following issues Science and Technology Studies STS the university and intellectual life neo liberal political economy intelligent design Cosmism Gnosticism agent oriented epistemology precautionary vs precautionary principles and Welfare State 2.0 *Relativism and Post-Truth in Contemporary Society* Mikael Stenmark, Steve Fuller, Ulf Zackariasson, 2018-09-17 This book approaches post truth and relativism in a multidisciplinary fashion Researchers from astrophysics philosophy psychology media studies religious studies anthropology social epistemology and sociology discuss and analyse the impact of relativism and post truth both within the academy and in society at large The motivation for this multidisciplinary approach is that relativism and post truth are multifaceted phenomena with complex histories that have played out differently in different areas of society and different academic disciplines There is hence a multitude of ways in which to use and understand the

concepts and the phenomena to which they refer and a multitude of critiques and defenses as well. No single volume can capture the ongoing discussions in different areas in all their complexity but the different chapters of the book can function as exemplifications of the ramifications these phenomena have had.

Relativism in the Philosophy of Science Martin Kusch, 2021-01-28

Relativism versus absolutism is one of the fundamental oppositions that have dominated reflections about science for much of its modern history. Often these reflections have been inseparable from wider social political concerns regarding the position of science in society. Where does this debate stand in the philosophy and sociology of science today? And how does the relativism question relate to current concerns with post truth politics?

In *Relativism in the Philosophy of Science* Martin Kusch examines some of the most influential relativist proposals of the last fifty years and the controversies they have triggered. He argues that defensible forms of relativism all deny that any sense can be made of a scientific result being absolutely true or justified and that they all reject anything goes. That is the thought that all scientific results are epistemically on a par. Kusch concludes by distinguishing between defensible forms of relativism and post truth thinking.

Social Epistemology and Epistemic Agency Patrick J. Reider, 2016-07-15

The field of epistemology is undergoing significant changes. Primary among these changes is an ever growing appreciation for the role social influences play on one's ability to acquire and assess knowledge claims. Arguably social epistemology's greatest influence on traditional epistemology is its stance on decentralizing the epistemic agent. In other words its practitioners have actively sought to dispel the claim that individuals can be solely responsible for the assessment, acquisition, dissemination and retention of knowledge. This view opposes traditional epistemology which tends to focus on the individual's capacity to form and access knowledge claims independent of his or her relationship to society.

Social Epistemology and Epistemic Agency is an essential resource for academics and students who ask in what manner does society engender its members with the ability to act as epistemic agents? What actions constitute epistemic agency and what type of beings can be epistemic agents?

A Cultural History of the Chinese Character "Ta" (她, She) Huang Xingtao, 2023-06-26

This book offers a thorough examination of the history of a Chinese female pronoun, the Chinese character Ta (她, She) and demonstrates how the invention and identification of this new word is inextricably intertwined with matters of sociocultural politics. The Chinese character Ta, for the third person feminine singular pronoun, was introduced in the late 1910s when the voices of women's liberation rang out in China. The invention and dissemination of this word not only reflected an ideological gendering of the Chinese script but also provoked heated academic and popular debate well into the 1930s. Thus the history of Ta provides a prism through which to explore modern Chinese history. The author provides an ambitious and informed examination of how Ta was invented and promoted in relation to the gender equality movement, the politics of neologism and other domestic elements and international catalysts. This book is the first major work to survey Ta's creation. It draws on diverse sources including interviews with eight historians who experienced the popularisation of Ta as youths in the 1930s and 40s. This book will be an essential read for

students and scholars of East Asian Studies Chinese Cultural History and those who are interested in the history of China

Post-Truth Steve Fuller, 2018-05-25 Post truth was Oxford Dictionaries 2016 word of the year While the term was coined by its disparagers in the light of the Brexit and US presidential campaigns the roots of post truth lie deep in the history of Western social and political theory Post Truth reaches back to Plato ranging across theology and philosophy to focus on the Machiavellian tradition in classical sociology as exemplified by Vilfredo Pareto who offered the original modern account of post truth in terms of the circulation of elites The defining feature of post truth is a strong distinction between appearance and reality which is never quite resolved and so the strongest appearance ends up passing for reality The only question is whether more is gained by rapid changes in appearance or by stabilizing one such appearance Post Truth plays out what this means for both politics and science

Minority Report William T. Lynch, 2020-10-16 In Philip K Dick's The Minority Report precogs who are imaginary individuals capable of seeing the future are relied upon to stop crime with a consensus report synthesized from two of three precogs When the protagonist is indicted for a future murder he suspects a conspiracy and seeks out the minority report detailing the suppressed testimony of the third precog Science works a lot like this science fiction story Contrary to the view that scientists in a field all share the same paradigm as Thomas Kuhn famously argued scientists support different and competing research programs Statements of scientific consensus need to be actively synthesized from the work of different scientists Not all scientific work will be equally credited by science as a whole While this system works well enough for most purposes it is possible for minority views to fail to get the hearing that they deserve This book analyzes the support that should be given to minority views reconsidering classic debates in science and technology studies and examining numerous case studies
