understanding of the concepts learned It is my belief that practice makes perfect and through hard work dedication and rigor every student can be successful Having attended Stanford University and worked with numerous students in college admissions counseling I know how competitive the college admissions process has become Students need to garner every inch of advantage to distinguish themselves from the rest of the application pool The SAT Subject Tests provide such an avenue Although most colleges do not require subject tests subject tests are usually highly recommended It is my greatest hope that this book will provide a great resource to each student studying for the Math Level 2 test I would welcome any comments suggestions or questions you may have via email to ondago@gmail.com In addition please feel free to email me with regards to any errors you may encounter while using the book Your feedback will be highly valuable in updating and the completion of any future editions of this book
