**Survival Guide for Scientists** Ad Lagendijk, 2008 During the course of Dutch physicist and Spinoza Prize winner Ad Lagendijk's long and influential career, he has published more than 300 articles, supervised over thirty doctoral dissertations, and given countless presentations and conference addresses. Over the years, his incisive consultations, tips, and rules for scientific study have proven themselves so beneficial to the emerging young scientists under his watch that he has been inundated with requests for a written version. Aimed primarily at undergraduate, graduate, and postdoctoral students in the natural sciences, *Survival Guide for Scientists* presents Lagendijk's practical how-to advice on essential topics such as the foundations for writing scientific texts, presenting data and research information, and writing and reading collegial e-mails. Each section is organized by a collection of short rules outlined and numbered in a logical order as self-explanatory pieces of information, allowing the reader the freedom to study any number of them in any desired order. These concrete guidelines are all supplemented by an extensive index that forms a reference text of its own with easy navigation, securing a place for the *Survival Guide for Scientists* on the shelves of scientific scholars and students alike.

Using real-world scenarios that apply to teachers, students, business professionals, medical professionals, and more, *Absolute Beginner's Guide to Tablet PCs* shows you how to put Tablet PCs to use in real life. The book shows you the basics for getting your Tablet PCs up and running, then kicks it into high gear and shows you how to put your newfound palmtop power to use. ***Mac User's Guide to Living Wirelessly*** Brad Miser, 2005 The major force driving people to embrace wireless computing is Wi-Fi. Once dismissed as a fad, Wi-Fi is rapidly becoming ubiquitous in the US and around the world. In 2004, more than half of all laptops sold in the US shipped with Wi-Fi installed. By 2007, most analysts predict that nearly every laptop sold in the US will include Wi-Fi. Nearly 20 million Wi-Fi access points will be sold this year, up 20% from last year. As these numbers grow, prices will continue to fall, making Wi-Fi more attractive to more and more people. By the end of this year, there will be more than 40,000 hotspots; public Wi-Fi access points available across the US in hotels, fast-food restaurants, cafés, airports, even parks. By 2007, that number will surpass 100,000. From

McDonald's to Kinko's to Holiday Inn Wi-Fi is becoming a killer amenity. Once Wi-Fi networks are in place, they can be used for much more than just Internet access. For example, the Airport Express allows users to stream iTunes throughout their homes wirelessly. Wi-Fi is being used to network printers, cameras, and ultimately home entertainment devices.
