Ruigu,1986 Doctor at Heart Dan Gikonyo,2024-09-24 Doctor at Heart is not just about Dr Gikonyo s life journey but it also delves into pertinent social economic and political issues at the local and global levels The author criss crosses generations and in so doing presents

their respective opportunities and challenges while at the same time advancing theories and worldviews that the reader will find very engaging. The book also brings out the authors' multiple skills, each of which he pursues with a passion. His authentic search for solutions to the challenges of life aptly depicts him as a Doctor at heart. Notably, Dr. Gikonyo emphasises some of the elements of transformation that he envisages for Kenya through a never before published interview of Mwai Kibaki, a transcript of which is included in the book.

Noncognitive Skills and Their Influencing Factors for Children Jinyan Zhou, 2021-12-19. Non-cognitive skills are often used to refer to those skills that do not fall within the cognitive category but to describe a stable pattern of thought, feeling, and behavior in different situations and backgrounds with profitable and investable characteristics such as conscientiousness, perseverance, and teamwork, which are critically important in education. However, for many years, non-cognitive skills have always been ignored in human capital theory. The book, using a multidisciplinary approach, tries to uncover the noncognitive components of human capital so as to answer the question: what is the skill that should be invested in? The author expands the connotations of human capital by exploring the value of noncognitive skills and their production patterns, constructing a measurement framework and a set of tools to measure noncognitive skills. She especially carries out an empirical survey which covers primary and secondary school students from seven provinces of China's east, middle, and west areas. With the data collected, she analyzes Chinese students' noncognitive development and further identifies the critical factors that may impact their noncognitive skills by applying the Bayesian Model Average approach. The book will be a theoretical contribution to education economics. Researchers interested in education in China, children's development, and policymakers in the field of education will find this book helpful and resourceful.
