Environmental Condition of the Mediterranean Sea

F.B. de Walle, M. Nikolopoulou-Tamvakli, W.J. Heinen, 1993-08-31 The Environmental Program for the Mediterranean EPM assesses the nature and the extent of the environmental problems in the Mediterranean Basin. It leads to recommendations for short to medium term actions. Policies, institutional measures, technical assistance and investment project proposals are necessary to ameliorate such problems. The EPM emphasizes the economic and financial implications of environmental protection. It suggests ways in which the countries of the region can achieve the high priority environmental investments that are recommended. The case is made for greater efforts from the international aid community to assist the Mediterranean countries in this endeavor. The EPM is a common initiative launched in 1988 by the European Investment Bank and by the World Bank. The World Bank has economic development as its main objective. The Bank has lent for development projects since 1946 primarily in the developing countries of the Third World. The EIB's main task under Article 130 of the Treaty of Rome is to contribute to the balanced development of the European Community; another of its priorities is the protection of the environment. The Netherlands Organization for Applied Scientific Research TNO derives its legal status from an Act of Parliament of 1930 on applied scientific research in the Netherlands. It is a fully independent R & D organization and currently has a staff of about 5 100 and a turnover of more than 370 million U.S. dollars a year. Studies by TNO are carried out in a number of institutes and laboratories located throughout the Netherlands. TNO's primary task is to support technological innovation in trade and industry, government agencies and community groups. TNO also assists clients and sponsors in solving problems. It conducts consultancy and transfers knowledge and know-how to individual companies and sector groups. Know-how is obtained from TNO's own research or is generated through collaboration with universities and third parties. The present study is sponsored by the European Investment Bank in the framework of the EPM. The TNO report gives an overview of the environmental condition of the Mediterranean, especially that of EC Mediterranean countries. It also estimates the environmental investment requirements for sewage treatment plants, river basin management, port reception facilities, other environmental protection measures. Connections, Mobilities, Urban Prospects and Environmental Threats Louis F.

Cassar, Annick Douguédroit, Theano S. Terkenli, 2015-09-10 This volume provides specialized insights into selected Mediterranean geographies such as info communication technologies, tourism, urbanization and climate change threats, with a focus on emerging and often overlooked issues in light of the impact of current trends of globalization and the financial crisis in the broader context of contemporary world processes of environmental change and accelerated human mobility. Specifically, the book contains sections on emergent and increasingly significant or highly innovative issues specific to the Mediterranean, often providing alternative perspectives on various pressing issues such as the northward shift of climatic types, littoralisation processes and urbanization trends, tourism growth problems, human exposure to environmental stresses and the boom in info communication technologies. As such, this book provides new insights into a region that has absorbed the sustained impact of human growth in precarious environments, often at the interface of many worlds co-existing at various

states of development and inter scalar or cross border interrelationships This volume does not cover every aspect of the human and physical geographies of the Mediterranean region but rather addresses contemporary issues of increasing significance to the Mediterranean with an emphasis on emergent and pressing issues as well as new perspectives or methods of approach of special relevance to the Mediterranean The core of contributions to this volume originated from an initiative undertaken by the International Geographical Union IGU Mediterranean Renaissance Program now the Commission on the Mediterranean Basin COMB Most papers are authored by members of the latter Commission and additional papers are included in order to cover more aspects of contemporary Mediterranean geographies Globalization and Environmental Challenges Hans Günter Brauch, Úrsula Oswald Spring, Czesław Mejsz, John Grin, Pál Dunay, Navnita Chadha Behera, Béchir Chourou, Patricia Kameri-Mbote, P. H. Liotta, 2008-01-23 Put quite simply the twin impacts of globalization and environmental degradation pose new security dangers and concerns In this new work on global security thinking 91 authors from five continents and many disciplines from science and practice assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization as well as the multifarious impacts of global environmental change in the early 21st century
