

Topic 2 Math Test

Round each number to the nearest 10. Circle your answer.

1. 82

- a. 40
b. 90
c. 80

2. 78

- a. 80
b. 20
c. 10

3. 243

- a. 230
b. 240
c. 300

Round each number to the nearest 100. Circle your answer.

4. 180

- a. 800
b. 200
c. 600

5. 247

- a. 600
b. 300
c. 200

6. 86

- a. 800
b. 200
c. 100

Estimate the sum to the nearest 10.

$$\begin{array}{r} 7. \quad 49 \longrightarrow \\ + 19 \longrightarrow + \\ \hline \end{array}$$

$$\begin{array}{r} 8. \quad 75 \longrightarrow \\ + 38 \longrightarrow + \\ \hline \end{array}$$

Estimate the difference to the nearest 100.

$$\begin{array}{r} 9. \quad 534 \longrightarrow \\ - 278 \longrightarrow - \\ \hline \end{array}$$

$$\begin{array}{r} 10. \quad 971 \longrightarrow \\ - 442 \longrightarrow - \\ \hline \end{array}$$

Find the value for x .

$$11. \quad 20 = 15 + x$$

$$x =$$

$$12. \quad 4 + x = 10$$

$$x =$$

$$13. \quad 20 - x = 17$$

$$x =$$

Solve.

14. A farm stand has 34 kinds of vegetables and 18 kinds of fruit. Estimate how many more kinds of vegetables there are than fruits there are.

Envision Math Grade 3 Topic Tests:

Improving Working Memory in Learning and Intellectual Disabilities Silvia Lanfranchi, Barbara

Carretti, 2016-08-05 The last forty years of research have demonstrated that working memory WM is a key concept for understanding higher order cognition To give an example WM is involved in reading comprehension problem solving and reasoning but also in a number of everyday life activities It has a clear role in the case of atypical development too For instance numerous studies have shown an impairment in WM in individuals with learning disabilities LD or intellectual disabilities ID and several researchers have hypothesized that this can be linked to their difficulties in learning cognition and everyday life The latest challenge in the field concerns the trainability of WM If it is a construct central to our understanding of cognition in typical and atypical development then specific intervention to sustain WM performance might also promote changes in cognitive processes associated with WM The idea that WM can be modified is debated however partly because of the theoretical implications of this view and partly due to the generally contradictory results obtained so far In fact most studies converge in demonstrating specific effects of WM training i e improvements in the trained tasks but few transfer effects to allied cognitive processes are generally reported It is worth noting that any maintenance effects when investigated are even more meagre In addition a number of methodological concerns have been raised in relation to the use of 1 single tasks to assess the effects of a training program 2 WM tasks differing from those used in the training to assess the effects of WM training and 3 passive control groups These and other crucial issues have so far prevented any conclusions from being drawn on the efficacy of WM training Bearing in mind that the opportunity to train WM could have a huge impact in the educational and clinical settings it seems fundamentally important to shed more light on the limits and potential of this line of research The aim of the research discussed here is to generate new evidence on the feasibility of training WM in individuals with LD and ID There are several questions that could be raised in this field For a start can WM be trained in this population Are there some aspects of WM that can be trained more easily than others Can a WM training reduce the impact of LD and ID on learning outcomes and on everyday living What kind of training program is best suited to the promotion of such changes

Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children's love of games songs and movement he's proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It's no longer just their teacher's math It's their math America's children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school

math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That s acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don t You know that to be true if you ve ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like $5 \times 7 = 12$, $17 \times 8 = 96$, $X \times 7 = 42$ and $56 \times 7 = 8$ and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget

Teaching Young Learners in a Superdiverse World Heather Lotherington, Cheryl Paige, 2017-04-07 This book documents a collaborative action research project in one school where researchers and practitioners worked together to develop multimodal literacies and pedagogies for diverse multilingual elementary classrooms Following chronologically from Lotherington s *Pedagogy of Multiliteracies* 2011 this volume picks up after teachers and researchers have learned how to work efficiently as a learning community to offer project based learning approaches This edited collection relates how teachers and students of different grade levels language backgrounds and abilities developed a shared agenda and created a framework for effective and inclusive practices Contributors demonstrate that collaboration creative pedagogical solutions and innovative project based learning are all essential parts of learning and teaching socially appropriate and responsive literacies in a multimodal superdiverse world

Resources in Education, 2001-10 [Press Summary - Illinois Information Service](#) Illinois Information Service, 1995

[Closing the School Discipline Gap](#) Daniel J. Losen, 2014-12-01 Educators remove over 3 45 million students from school annually for disciplinary reasons despite strong evidence that school suspension policies are harmful to students The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today s profound inequities in educational opportunity and outcomes Part I explores how suspensions flow along the lines of race gender and disability status Part II examines potential remedies that show great promise including a district wide approach in Cleveland Ohio aimed at social and emotional learning strategies *Closing the School Discipline Gap* is a call for action that focuses on an area in which public schools can and should make powerful improvements in a relatively short period of time

Improving Our Competitiveness United States. Congress. House. Committee on Education and Labor, 2010

Expanding the Numerical Central Conceptual Structure Laura Christine Bofferding, 2011 In working with integers students have difficulties that may extend into middle school and even adulthood However even young children can display insights into negative numbers well before receiving formal instruction Using a pre test instruction post test design this study explores how 61 first graders reason about negative number properties and operations and how their

understanding changes depending on the instruction they receive Results of the study indicate that children build on their existing whole number understanding to develop a central conceptual structure for integers Furthermore the process by which they extend their numerical central conceptual structure differs among students their initial schemas together with the form of the integer instruction influence how they reason about and solve integer addition and subtraction problems These results highlight the need to revisit the placement duration and content of integer instruction in curricula

Adapting Instruction for Mainstreamed and At-risk Students Judy W. Wood, 1992 The author's step by step sequential approach to the material specifically geared to the practitioner fills each chapter with ideas suggestions and activities both regular and special teachers can use with any pupil who finds it difficult to learn in the traditional classroom setting
