Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license

Journal of the Senate, State of Florida Florida. Legislature. Senate, 2014 *Curriculum Practice in the Elementary and Middle School* J. Allen Queen, 1999 This first edition book offers very current treatment of curriculum issues instructional planning and new curriculum standards The book integrates elements of the major historical philosophical and social influences upon past curriculum development It compares traditional and futurist philosophies and describes the developmental aspects of children and their changing needs and interests within a framework of instructional expectations at specific grade levels It also teaches the skills of curriculum development and instructional design While a balanced coverage of viewpoints has been attempted the book is intended to open new avenues by including educational futurism in a curricular model It contains key chapter concepts focus questions a futurist curriculum model actual units of instruction and exercises for the reader to try For educators at the elementary and middle school levels *Leading Schools in Challenging Times* Bruce Anthony Jones, Anthony Rolle, 2016-03-01 Over the past 30 years our public school system has received an unprecedented amount of attention as this concerns methods of school reform and policy strategies for bringing about this reform During the 1980s the emphasis of school reform was on transparency through school community partnerships Business and philanthropy for example became involved with issues of schooling that was unheard of prior to this period The 1980s also gave rise to issues of school finance and student performance that went beyond traditional views that tended to focus on finance adequacy to views that focused more on school finance arrangements that would lead to actual equitable outcomes in student performance The 1990s witnessed the emergence of the comprehensive school reform movement whereby curriculum outsourcing occurred at rates that had never occurred before With this movement the role of teachers and school leaders in the creation of school curriculum diminished as school districts increasingly purchased vendor related curriculum packages which included teacher and leader training modules and methods of curriculum assessment On the heels of the increasing tendency of school districts to outsource school curriculum to curriculum vendors came a rise in demands for school accountability and school outcomes This was particularly evident with the passage of No Child Left Behind Act NCLB 2001 NCLB was also developed within a political context that called for demands in the academic improvement of schools and school districts that housed historically disenfranchised students These demands were particularly important as the nation experienced and continues to experience dramatic increases in student racial and ethnic

diversity This volume entitled *Leading Schools in Challenging Times Eye to the Future* discusses varying types of school leadership in the context of key topics that have been at the center of on going school reform in the United States These topics include challenges opportunities and issues associated with our administrator and teacher leadership pipeline preparation and development leadership and school finance reform leadership and changing student and population demographics leadership and the role of community issues of leadership policy public accountability and school performance outcomes The authors also explicate these issues with a view to the future and the status of leadership in our public school system

Books In Print 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004

The Psychometrics of Standard Setting Mark D. Reckase,2023-01-31 This book provides a unifying structure for the activities that fall under the process typically called standard setting on tests of proficiency Standard setting refers to the methodology used to identify performance standards on tests of proficiency The results from standard setting studies are critical for supporting the use of many types of tests The process is frequently applied to educational psychological licensure certification and other types of tests and examination systems The literature on procedures for standard setting is extensive but the methodology for standard setting has evolved in a haphazard way over many decades without a unifying theory to support the evaluation of the methods and the validation of inferences made from the standards This book provides a framework for going beyond specific standard setting methods to gain an understanding of the goals for the methods and how to evaluate whether the goals have been achieved The unifying structure provided in this book considers policy that calls for the existence of performance standards the relationship of proficiency test design to the policy and tasks assigned to subject matter experts to help them convert the policy to estimates of locations on the reporting score scale for the test The book provides guidance on how to connect the psychometric aspects of the standard setting process to the intentions of policy makers as expressed in policy statements Furthermore the structure is used to support validity arguments for inferences made when using standards Examples are provided to show how the unifying structure can be used to evaluate and improve standard setting methodology

NEW Florida Civics Benchmark Workbook John Meeks,2016-11-30 Florida Seventh Grade Civics End of Course EOC Exam preparation workbook

English Language Learners in the Southeastern United States Ester J. de Jong,Eric Dwyer,Mary Elizabeth Wilson-Patton,2024-07-25 This book examines the impact of and response to the rapidly growing English language learner ELL populations in the southeastern United States on K 16 schooling Using examples of policy and practice from seven states Alabama Arkansas Florida Georgia North Carolina and Tennessee the book explores how the contemporary context of accountability regimes and neoliberal tenets affect educational responses to the increased linguistic and cultural diversity in schools and how these realities may be different from when traditional states such as California or Florida were developing their responses to im migration The collection of chapters addresses key questions of teacher preparation effective infrastructures and frameworks for serving ELLs dual language bilingual education and

advocacy efforts at the state district and local level in the Southeast The authors describe promising practices in each state but also note the need for more systemic statewide approaches that resist the enduring monolingual discourse that has historically characterized much of ELL schooling They call for transformative policies and practices that take current research into account and that stress the centrality of pluralistic principles to design effective schools for ELLs
