PROGRAMMING AND DIAGNOSTICS

USER MANUAL

Type "31" fireman's operation (Hong Kong)

- Enter the fireman's floor (0 + 31) into Function 08, Variable 06
- Enter value "31" into Function 08, Variable 23

TYPE A: - With the fireman's key at the floor only. If the key is set to:

- "ON"**
 - 1) If the car is travelling upwards, it must stop and return to the floor. If the car is travelling downwards, it will continue its travel directly towards the fireman's floor. If the car is stationary at a floor, it will travel to the fireman's floor. In any of the above conditions, the car and landing doors will be kept closed and the internal and external calls will be ignored.
 - 2) When the car reaches the fireman's floor, the doors will be open, but the internal and external calls will continue to be ignored.
- "OFF"**
 - The lift resumes normal operation.

TYPE B: - With the fireman's key at the floor and in the car. If, whilst the key in the car is set to "OFF", the key at the floor is set to:

- "ON"**
 - 1) If the car is travelling upwards, it must stop and return to the floor. If the car is travelling downwards, it will continue its travel directly towards the fireman's floor. If the car is stationary at a floor, it will travel to the fireman's floor. In any of the above conditions, the car and landing doors will be kept closed and the internal and external calls will be ignored.
 - 2) When the car reaches the fireman's floor, the doors will be open, but the internal and external calls will continue to be ignored.
- "OFF"**
 - The lift resumes normal operation only if the fireman's key in the car remains in the "OFF" position and the car is stationary at the fireman's floor.

If the fireman's key in the car is set to:

- "ON"**
 - The system ignores the key at the floor, the doors will be closed only by means of the constant pressure of a landing pushbutton or the "door close" pushbutton (in the car), whilst the external calls will remain disabled. The pressure shall be maintained until the doors are fully open, otherwise the doors will open again and the registration will be automatically cancelled. Upon arrival at the registered floor, the car will stop but the doors will remain closed until a constant pressure is exerted on the "door open" pushbutton; if this pushbutton is released before the complete opening of the doors, the doors will close again. All the car calls will be cancelled at every stop.
- "OFF"**
 - The lift resumes normal operation only if the fireman's key at the floor remains in the "OFF" position and the car is stationary at the fireman's floor. If not, the doors will remain open and the internal and external calls will be ignored.

Note: During the fireman's operation the photocells are not operative.
