Specific areas included computation with words, fuzzy computation, granular computation, neural computation, quantum computation, evolutionary computation, DNA computation, chemical computation, information processing in cells and tissues, molecular computation, artificial life, swarm intelligence, ants colony, artificial immune systems etc with innovative applications to knowledge discovery, nanotechnology operations research and more. Discovery Science Achim Hoffmann, Hiroshi Motoda, Tobias Scheffer, 2005-10-24. This book constitutes the refereed proceedings of the 8th International Conference on Discovery Science DS 2005 held in Singapore in October 2005 co-located with the International Conference on Algorithmic Learning Theory ALT 2005. The 21 revised long papers and the 6 revised regular papers presented together with 9 project reports and 5 invited papers were carefully reviewed and selected from 112 submissions. The papers cover all issues in the area of automating scientific discovery or working on tools for supporting the human process of discovery in science.

**Computer Analysis of Images and Patterns** André Gagalowicz, 2005-08-30. This volume presents the proceedings of the 11th International Conference on Computer Analysis of Images and Patterns CAIP 2005. This conference series started about 20 years ago in Berlin. Initially the conference served as a forum for meetings between scientists from Western and Eastern block countries. Nowadays the conference attracts participants from all over the world. The conference gives equal weight to posters and oral presentations and the selected presentation mode is based on the most appropriate communication medium. The program follows a single track format rather than parallel sessions. Non overlapping oral and poster sessions ensure that all attendees have the opportunity to interact personally with presenters. As for the numbers we received a total of 185 submissions. All papers were reviewed by two to four members of the Program Committee. The final selection was carried out by the Conference Chairs. Out of the 185 papers 65 were selected for oral presentation and 43 as posters. CAIP is becoming well recognized internationally and this year's presentations came from 26 different countries. South Korea proved to be the most active scientifically with a total of 16 accepted papers. At this point we wish to thank the Program Committee and additional referees for their timely and high quality reviews. The paper's mission and review procedure was carried out electronically. We also thank the invited speakers Reinhardt Koch and Thomas Vetter for kindly accepting to present invited papers.
