Software Engineering for Agile Application Development is a collection of innovative research on the methods and implementation of adaptation practices in software development that improve the quality and performance of IT products. The presented materials combine theories from current empirical research results as well as practical experiences from real projects that provide insights into incorporating agile qualities into the architecture of the software so that the product adapts to changes and is easy to maintain. While highlighting topics including continuous integration configuration management and business modeling, this book is ideally designed for software engineers, software developers, engineers, project managers, IT specialists, data scientists, computer science professionals, researchers, students, and academics. **The**

Future of Energy Efficiency in Post-COVID-19 Era Muhammad Mohsin, Yu Hao, Abdul Khaliq Rasheed, Muhammad Irfan, Feng Sheng Chien, 2025-02-10. The COVID-19 pandemic has led several governments to impose movement control, resulting in serious challenges towards the research, development, and commercialization of sustainable energy generation and conversion technologies. As a result of the economic slowdown in many parts of the world, the poor are in distress. Experts believe that a fast recovery from the COVID-19 epidemic or any future disaster will need clean and sustainable energy. However, questions arise on what type of renewable energy technologies will ensure our resilience in the face of future disasters like COVID-19 that aids rebuilding economies and puts nations on track to meet global climate and sustainable development goals. Therefore, this Research Topic primarily aims at compiling recent progress on energy generation, conversion, and resource utilization that would help resolve energy problems amidst and post COVID-19 pandemic. Grid and Pervasive Computing James J. (Jong Hyuk) Park, Hamid R. Arabnia, Cheonshik Kim, Weisong Shi, Joon-Min Gil, 2013-11-13. Damages and Compensation Culture Eoin Quill, Raymond J Friel, 2016-11-17 The focus of the essays in this book is on the relationship between compensation culture social values and tort damages for personal injuries A central concern of the public and political perception of personal injuries claims is the high cost of tort claims to society reflected in insurance premiums often accompanied by an assumption that tort law and practice is flawed and improperly raising such costs The aims of this collection are to first clarify the relationship between tort damages for personal injuries and the social values that the law seeks to reflect and to balance then to critically assess tort reforms including both proposals for reform and actual implemented reforms in light of how they advance or hinder those values Reforms of substantive and procedural law in respect of personal injury damages are analysed with perspectives from England and Wales Canada Australia Ireland and continental Europe The essays offer valuable insights to anyone interested in the reform of tort law or the tort process in respect of personal injuries

Shaping Regionality in Socio-Economic Systems: Late Hellenistic - Late Roman Ceramic Production, Circulation, and Consumption in Boeotia, Central Greece (c. 150 BC-AD 700) Dean Peeters, 2023-02-23 This book sheds some necessary light on local economies from the late Hellenistic to the Late Roman period The concepts of regions and regionality are employed to explore the complexity of ancient economies and ceramic variability and change in Boeotia Central Greece largely on the basis of the survey data generated by the Boeotia Project

Essential Cases on Misconduct Benedict Winiger, Ernst Karner, Ken Oliphant, 2018-01-22 The various national European legal systems offer a broad range of responses to the question of what can be regarded as wrongful behaviour or fault The present work systematically examines these two important prerequisites for tortious liability under the combined heading of misconduct Unlike current textbooks national casebooks and monographs it builds on the experiences gathered in the national legal systems over the past decades and thereby fills a major gap which still exists today It thus does what the previous volumes in the Digest of European Tort Law series did for other key elements of tort law namely natural causation and damage Once again the publication contains a selection of the most important cases from 28 states across Europe as well as cases handed down by European Union courts it also highlights cases from earlier periods of legal history

For each case the facts and the relevant court decision are presented and these are then accompanied by an analytical commentary. In addition the editors provide comparative analyses of the cases reported and a special report is dedicated to how key decisions would be resolved under model European rules on tort law. The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe. It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national codifications, European legislation and modern model rules.
