International Economic Law and Governance Julien Chaisse, Tsai-yu Lin, 2016-08-11 Nation states have long and successfully claimed to be the proper and sovereign forum for determining a country's international economic policies Increasingly however supranational and non governmental actors are moving to the front of the stage New forms of multilateral and global policy making have emerged including states and national administrations key international organizations international conferences multinational enterprises and a wide range of transnational pressure groups and NGOs that all claim their share in exercising power and influence on international and domestic policy making In honour of Professor Mitsuo Matsushita's intellectual contributions to the field of international economic law this volume reflects on the current state and the future of international economic law The book addresses a broad spectrum of themes in contemporary international economic regulations and focuses specifically on the significant areas of Professor Matsushita's scholarship including the rise of the soft law mechanism in international economic regulation the role of the WTO and dispute settlement and specific areas such as competition subsidies anti dumping intellectual property and natural resources Part one of the volume provides a comprehensive and critical analysis of the rule based international dispute settlement mechanisms Part two investigates the normative influences to and from WTO law and Part three focuses on policy and law making issues

The Economics of the Global Environment Graciela Chichilnisky, Armon Rezai, 2017-05-18 This is the

first book combining research on the Global Environment Catastrophic Risks and Economic Theory and Policy Modern economic theory originated in the middle of the twentieth century when industrial expansion coupled with population growth led to a voracious use of natural resources and global environmental concerns It is uncontested that for the first time in recorded history humans dominate the planet changing the planet's atmosphere its bodies of water and the complex web of species that makes life on earth This radical change in circumstances led to rethinking of the foundations of human organization and in particular the industrial economy and the economic theory behind it This book brings together new approaches on multiple levels environmental sustainability requires rethinking in terms of economic theory and policy as well as the considerations of catastrophic risk and extremal events Leading experts address questions of economic governance risk management policy decision making and distribution across time and space Essays in Economic and Business History, 2019 The International Business Environment Leslie Hamilton, Philip Webster, 2018 The most multi perspective succinct and applied guide to international business environments **Grid-locked African Economic Sovereignty** Victor Warikandwa, Artwell Nhemachena, 2019-02-06 The emergent so called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age old questions about African ownership and control of their resources Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro America developed due to the industrial revolutions **Small States in the Multilateral Trading System** Laura Gosset, 2015-11-20 Developing countries including as small states and least developed countries LDCs continue to face significant challenges within the global trading system Action is required to allow them to overcome disadvantages and achieve sustainable levels of income from trade This study provides a fresh perspective on how measures can be taken to enhance the participation of small states many of which are Commonwealth countries in the multilateral trading system It contributes to the ongoing general debate about reforming the World Trade Organization and global trade governance *Development Challenges and Solutions After the Arab Spring* Ali Kadri, 2016-01-26 Since the events of 2011 most Arab countries have slipped into a state of war and living conditions for the majority of the working population have not changed

for the better This edited collection examines the socioeconomic conditions and contests the received policy framework to demonstrate that workable alternatives do exist

Japan's Effectiveness as a Geo-Economic Actor Yuka Koshino, Robert Ward, 2022-03-27 Geo economic strategy deploying economic instruments to secure foreign policy aims and to project power has long been a key element of statecraft In recent years it has acquired even greater salience given China's growing antagonism with the United States and the willingness of both Beijing and Washington to wield economic power in their confrontation This trend has particular significance for Japan given its often tense political relationship with China which remains its largest trading partner While Japan's post war geo economic performance often failed to match its status as one of the world's largest economies more recently Tokyo has demonstrated increased geo economic agency and effectiveness In this Adelphi book Yuka Koshino and Robert Ward draw on multiple disciplines including economics political economy foreign policy and security policy and interviews with key policymakers to examine Japan's geo economic power in the context of great power competition between the US and China They examine Japan's previous underperformance how Tokyo's understanding of geo economics has evolved and given constraints on its national power projection what actions Japan might feasibly take to become a more effective geo economic actor Their conclusions will be of direct interest not only for all those concerned with Japanese grand strategy and the Asia Pacific but also for those middle powers seeking to navigate great power competition in the coming decades

Cultures of Wellbeing Sarah White, Chloe Blackmore, 2016-01-26 The authors challenge psychological perspectives on happiness and subjective wellbeing Highlighting the politics of quantitative and qualitative methodologies case studies across continents explore wellbeing in relation to health children and youth migration economics religion family land mines national surveys and indigenous identities

Economics in Persian-Period Biblical Texts Peter Altmann, 2016-10-26 Large scale economic change such as the rise of coinage occurred during the Persian dominated centuries 6th 4th centuries BCE in the Eastern Mediterranean and ancient Near East How do the biblical texts of the time respond to such developments In this study Peter Altmann lays out foundational economic conceptions from the ancient Near East and earlier biblical traditions in order to show how Persian period biblical texts build on these traditions to address the challenges of their day Economic issues are central for how Ezra and Nehemiah approach the topics of temple building and of Judean self understanding and economics are also important for other Persian period texts Following significant interaction with the material culture and extra biblical texts the author devotes special attention to the ascendancy of economics and its theological and identity implications as structuring metaphors for divine action and human community in the Persian period

Media & Entertainment Law Ursula Smartt, 2017-02-03 Media Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industries both in terms of its practical application and its theoretical framework providing a broad and comprehensive coverage of these fast changing branches of the law Fully restructured to complement how media law is taught today in the digital age this third edition explores recent

updates in the law including the outcomes of the Google Spain case and the right to be forgotten the use of drones in breach of privacy laws internet libel and the boundaries of media freedom and press regulation following the Leveson inquiry Media Entertainment Law uses the most up to date authorities to explore privacy and confidentiality subjects such as the Prince Charles black spider letters the Maximilian Schrems and the celebrity superinjunction PJS v Newsgroup Newspapers cases The book also covers defamation contempt of court and freedom of information plus Scots law New to this edition A brand new chapter is dedicated to exploring technology and the media including contemporary issues such as the dark web the surveillance state internet censorship and the law and social media including bloggers vloggers and tweeters The chapters on regulatory authorities have been expanded to provide greater clarification and explanation of broadcasting press and advertising regulation including the protection of journalistic sources and comparisons with EU Law The chapter on intellectual property and entertainment law has been streamlined to match media law courses more effectively This text provides students with detailed coverage of the key principles cases and legislation as well as a critical analysis of this vibrant subject

Fractal Sustainability Isabel Canto de Loura, Robin Dickinson, 2016-08-12 Even though the fractal approach to sustainability and organizational change management is not new no authors so far seem to have truly attempted to use fractals as a mathematical means to map and measure organizational sustainability Several sustainability maturity models and change management models and frameworks concepts and computer generated systems came to the fore during the past two decades They provided a set of useful tools for managers academics and students to refer to or on which to base their own actions and plans However one issue remains most of those models and frameworks share a rather similar linear skeleton the main difference between them is the quantitative variety of steps within each phase stage and parameter and how in depth each of these is presented The authors work addresses a clear gap in the literature and in applied research as it emphasizes the relevance of using a complex mathematically based but user friendly fractal approach Readers are able to better understand implement map and measure change management processes leading to a sustainability focused mindset Subsequent chapters guide you through the steps towards creating committed sustainability based strategies attitudes actions and practices across all levels in the broad organizational context This text is essential reading for students researching business and management and who are interested in the Fractal Sustainability concept

Kritika: Essays on Intellectual Property Peter Drahos, Gustavo Ghidini, Hanns Ullrich, 2015-09-25 The field of intellectual property has broadened and deepened in so many ways and at such pace that there is a tendency for academic commentators to focus on the next new thing or to react immediately to judicial developments rather than to reflect more deeply on the greater themes of the discipline The Kritika Essays on Intellectual Property series is a series of books that are designed to fulfill this role by creating a forum for essays that take a critical long term approach to the field of intellectual property Breaking down the barriers of specialization and laying the foundation for an emergent critical scholarship this first book in the series brings

together the leading scholars in the field to reflect deeply on the current state and future of their discipline Imperial Theory and Colonial Pragmatism David J. Gilchrist,2017-09-04 This book considers the role played by co operative agriculture as a critical economic model which in Australia helped build public capital drive economic development and impact political arrangements In the case of colonial Western Australia the story of agricultural co operation is inseparable from that of the story of Charles Harper Harper was a self starting pioneering frontiersman who became a political commercial and agricultural leader in the British Empire s most isolated colony during the second half of the Victorian era He was convinced of the successful economic future of Western Australia but also pragmatic enough to appreciate that the unique challenges facing the colony were only going to be resolved by the application of unorthodox thinking Using Harper s life as a foil this book examines Imperial economic thinking in relation to the co operative form of economic organisation the development of public capital and socialism It uses this discussion to demonstrate the transfer of socialistic ideas from the centre of the Empire to the farthest reaches of the Antipodes where they were used to provide a rhetorical crutch in support of purely pragmatic co operative establishments The SAGE Handbook of Research in International Education Mary Hayden,Jack Levy,Jeff Thompson,2015-10-13 The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as international global and multicultural are being re evaluated Fully updated and revised and now including new contributions from research in South East Asia the Middle East China Japan Australasia and North America the new edition of this handbook analyses the origins interpretations and contributions of international education and explores key contemporary developments including internationalism in the context of teaching and learning leadership standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education including researchers and teachers in universities governmental and private curriculum development agencies examination authorities administrators and teachers in schools Handbook of Research on Sustainable Development and Economics Thomas, Ken D.,2015-04-30 With a current world population that exceeds seven billion resource consumption awareness is more important than ever Investing in sustainable technologies and renewable resources is a necessary step to ensure the future quality of life of all human beings The Handbook of Research on Sustainable Development and Economics explores topics such as poverty gender equality health security and the environment through global empirical studies and fundamental frameworks With the goal of promoting sustainable techniques for the global future this handbook is a critical reference for business leaders educators policymakers environmental specialists and the public at large **The Global Lab** Adam Fejerskov,2022-06-16 The Global Lab tells the story of a group of organizations and corporations using low income countries as a laboratory It reveals experiments with untested technologies biometric humanitarian solutions and radical methodologies for social change The book maps out the

political institutional and ethical coordinates of emergent transnational practices of experimentation asking where and how this movement works while unfolding the human philosophical and political consequences of its ideas and interventions The book takes the reader through Silicon Valley Africa and Asia to understand the tangible and transformative implications of contemporary human experimentation It follows a set of main protagonists from the Bill and Melinda Gates Foundation to experimental economists known as the randomistas to humanitarian organizations and pharmaceutical companies These actors form a movement inspired by the logic of Silicon Valley about the need for fast paced radical change and societal disruption technological innovation as progress and the privatization and commercialization of the human mind and body Ultimately the book examines the inequality of experimentation that is found in the erection of walls between us and them and the imagined universal and often unquestioned value of scientific and technological progress
