Essay On Paper1 Life Sciences:

X-kit FET Grade 12 LIFE SCIENCE, 2008 Essays on the Anthropology of Reason Paul Rabinow, 2021-05-11 This collection of essays explains and encourages new reflection on Paul Rabinow's pioneering project to anthropologize the West. His goal is to exoticize the Western constitution of reality, emphasize those domains most taken for granted as universal, and show how their claims to truth are linked to particular social practices, hence becoming effective social forces. He has recently begun to focus on the core of Western rationality, in particular the practices of molecular biology as they apply to our understanding of human nature. This book moves in new directions by posing questions about how scientific practice can be understood in terms of ethics as well as in terms of power. The topics include how French socialist urban planning in the 1930s engineered the transition from city planning to life planning; how the discursive and nondiscursive practices of the Human Genome Project and biotechnology have refigured life, labor, and language; and how a debate over patenting cell lines and over the dignity of life required secular courts to invoke medieval notions of the sacred. Building on an ethnographic study of the invention of the polymerase chain reaction, which enables the rapid production of specific sequences of DNA in millions of copies, Rabinow, in the final essay, reflects in dialogue with biochemist Tom White on the place of science in modernity, on science as a vocation, and on the differences between the human and natural sciences.

German Essays on Science in the 20th Century: Albert Einstein, Werner Heisenberg, Max Planck, and Ot Wolfgang Schirmacher, 1996-09 The 20th century has brought us to the high point of the scientific technological age but paradoxically marks the beginning of a critical loss of confidence in the very powers of science. This volume, in *The German Library*, a companion to volume 36 *German Essays on Science in the 19th Century* also edited by Wolfgang Schirmacher, represents the sciences in a comprehensive way: Physics, Biochemistry, Ecology, Ethology, Social Sciences, Law, and Culture. Writers and scientists represented include Robert Bosch, Albert Einstein, Otto Hahn, Werner Heisenberg, Konrad Lorenz, Lise Meitner, Max Planck, Georg Simmel, Max Weber, and many others.

thoroughly Researched Content by experts Essays in the History of Canadian Law Hamar Foster, John McLaren, 1995-12-15 This sixth volume in the Osgoode Society's distinguished series on the history of Canadian law turns to the a central theme in the history of British Columbia and the Yukon law and order In the early days of British sovereignty the frenzied activity of the fur trade and the gold rush along with clashes between settlers and Natives made law enforcement a difficult business Later although law and order were more firmly established tensions continued between the dominant populations committed to the practice and rhetoric of British justice and those groups owing allegiance to other value systems such as Native peoples Asian immigrants and Doukhobors or those resisting authority criminals and the criminally insane These essays look at key social economic and political issues of the times and show how they influenced the developing legal system The essays cover a wide range of topics and explore the human as well as the legal dimensions of their subjects relating specific cases to broader theory They demonstrate that English law has been flexible enough to accommodate diversity and is therefore pragmatic The volume also proves that there is no single Canadian legal culture geography demography politics economics and military considerations have had an impact on the shape of our legal culture The introduction by John McLaren and Hamar Foster pulls together the many regional themes to provide a clear overview of the legal complexities of the period Essays on David Hume, Medical Men and the Scottish Enlightenment Roger L. Emerson, 2016-05-13 The Scottish Enlightenment was a period of intellectual and scientific progress in a country previously considered to be marginal to the European intellectual scene Yet the enlightenment was not about politeness or civic humanism but something more basic the making of an improved society which could compete in every way in a rapidly changing world David Hume writing in 1752 commented that industry knowledge and humanity are linked together by an indissoluble chain Collectively this volume of essays embraces many of the topics which Hume included under industry knowledge and humanity from the European Enlightenment and the Scots relation to it to Scottish social history and its relation to religion science and medicine Overarching themes of what it meant to be enlightened in the eighteenth century are considered alongside more specific studies of notable figures of the period such as Archibald Campbell 3rd Duke of Argyll and David Hume and the training and number of Scottish medical students Together the volume provides an opportunity to step back and reconsider the Scottish Enlightenment in its broader context and to consider what new directions this field of study might take **Selected Essays by Frank H. Knight, Volume 1** Frank H. Knight, 1999 Frank H Knight 1885 1972 was a central figure many say the dominant influence in the development of the Chicago School of Economics at the University of Chicago in the 1930s and 1940s where he taught future Nobel laureates Milton Friedman James Buchanan George Stigler and many other notable scholars It was Knight's embedded skepticism about the reach of economic knowledge that set the stage for the laissez faire economics that matured at the University in the 1950s and 1960s But as important as Knight's technical economic contributions were he never strayed far from his broad philosophical interests and

concern for the state of modern liberal democracy Ross B Emmett s selection of Knight s essays is the first to offer a comprehensive picture of the work of this notable social scientist over the span of his career Included are not only Knight s most influential writings but also a number of uncollected papers which have not previously been widely accessible These essays illustrate Knight s views on the central debates regarding economics social science ethics education and modern liberalism Volume 1 What is Truth in Economics contains fifteen of Knight s papers up through 1940 Volume 2 Laissez Faire Pro and Con includes fourteen of Knight s papers from 1940 through 1967 including Socialism The Nature of the Problem and The Sickness of Liberal Society These twenty nine essays together stand not only as a monument to one of economics most significant and original thinkers but will also serve as an invaluable resource for economists philosophers and political scientists interested in the development of the western liberal tradition
